A variable annuity is a long-term investment for retirement. An insurance company accepts premiums and provides future income or a lump sum to the contract owner by contractual agreement. Contract limitations, fees and charges include, but are not limited to, mortality and risk expense charges, administrative fees, sales and surrender charges, and added charges for optional benefits. Withdrawals may be subject to charges, and may reduce annuity contract benefits and values.

Annual operating fund expenses vary from year to year depending on contractual fee waivers and/or expense reimbursements, which may be voluntary and terminated at any time or subject to board approval, or may expire in accordance with a contractual termination date.

The current net expenses of the portfolio may include a reduction in the expense amount for fee waivers or expense reimbursement. Current net expenses are from the prospectuses and subject to change. Please refer to the prospectus for the amount of the fee waivers and expense reimbursement for a particular portfolio. If fee waivers and expense reimbursement are not applied ("Gross Expense"), it could significantly increase the amount of operating expenses for the portfolio.
