FORT WASHINGTON HIGH YIELD FIXED INCOME – 2Q2025

GENERAL INFORMATION

Inception Date: 07/01/1994

Total Assets: \$4.0 billion

Style: High Quality/Strategic

Benchmark: Bloomberg US

High Yield Ba/B 2% Issuer Cap

VEHICLE AVAILABILITY

- ▶ Separate Account
- ▶ Mutual Fund
- ▶ Commingled Fund

STRATEGY OVERVIEW

- ▶ Invests in higher-quality, less-volatile segments
- ▶ Top-down manages risk, while Bottom-up analysis builds a high-quality diversified portfolio
- ▶ 30+ year track record with a focus on steady returns and principal protection

PHILOSOPHY

We believe that the higher quality segments of the high yield market can produce attractive absolute and relative returns, best achieved by:

- ▶ Strategically minimizing default risk
- ▶ Executing a consistent repeatable process
- ▶ Emphasizing risk control via rigorous portfolio analysis, portfolio diversification, position limits, and proactive selling

ABOUT FORT WASHINGTON

- ▶ Founded in 1990; \$90.5 billion in current total assets under management¹
- ▶ Organizational hallmarks include: stability of teams, consistency of process, competitive performance, deep resources, and alignment of interests

Composite inception and creation date: 07/01/1994. ¹Effective 04/01/2025, the benchmark was changed retroactively. Prior to 04/01/2025, the benchmark for this composite was the Bloomberg US Corporate High Yield Index. The benchmark change was made to provide a comparison index that is better aligned with the strategy's investment objective. ²The 3-Year annualized ex-post standard deviation is calculated using monthly gross-of-fee returns to measure the average deviations of returns from its mean. ³Dispersion is not calculated for years in which the composite contains five portfolios or less. Dispersion is calculated as the equal weighted standard deviation of gross-of-fee returns for those portfolios held in the composite during the entire period. Past performance is not indicative of future results. The benchmark for this composite is the Bloomberg US High Yield Ba/B 2% Issuer Cap Index. The Bloomberg US High Yield Ba/B 2% Issuer Cap Index measures the performance of the U.S. dollar-denominated, below-investment-grade-corporate debt. It includes Ba/B-rated bonds only, and each issuer is capped at 2% of the total index market value. The index accounts for interest payments by incorporating them into the total return calculation. Fort Washington's High Yield strategy seeks to outperform over a full market cycle (typically 3-5 years) by protecting principal in periods of market decline while providing a stable base of income across all periods. The focus is on the higher-quality credits exhibiting lower default risk and mature sectors that can be expected to weather a full market cycle. All fee-paying, fully discretionary portfolios managed in the High Yield Fixed Income style, with a minimum of \$20 million under our management, are included in this composite. The strategy's fee schedule is 0.50% on the first \$100 million and 0.45% on additional amounts over \$100 million for separate accounts, and 0.55% for the commingled vehicle. Portfolios in this composite include cash, cash equivalents, investment securities, interest and dividends. Cash is maintained, within each separately managed account segment, in accordance with our asset allocation ratio. The U.S. dollar is the base currency. The specific securities identified and described do not represent all of the securities purchased, sold, or recommended. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net returns reflect the portfolio's gross returns with the deduction of expenses and other costs associated with the management of the investments in the portfolio as well as the deduction of the highest advertised fee rate for the applicable strategy shown. Individual portfolio returns are calculated on a daily valuation basis. Prior to 01/01/1997, individual portfolio returns were calculated monthly using a time-weighted return method. Fort Washington Investment Advisors, Inc. (Fort Washington), a wholly owned subsidiary of The Western and Southern Life Insurance Company, is a registered investment advisor and provides discretionary money management to a broad range of investors, including both institutional and individual investors. Assets under management include all portfolios managed by Fort Washington and exclude assets managed by and marketed as its Private Equity business unit. Fort Washington claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. Fort Washington has been independently verified for the periods 07/01/1994–12/31/2023. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. To receive a complete list and description of composites, contact Fort Washington by phone at 888.244.8167, in writing at 303 Broadway, Suite 1200, Cincinnati, Ohio 45202, or online at fortwashington.com.

RISK DISCLOSURE

The High Yield Fixed Income strategy invests in fixed-income securities which can experience reduced liquidity during certain market events, lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. The High Yield Fixed Income strategy invests in non-investment grade debt securities which are considered speculative with respect to the issuers' ability to make timely payments of interest and principal, may lack liquidity and has had more frequent and larger price changes than other debt securities. The High Yield Fixed Income strategy invests in foreign securities which carry the associated risks of economic and political instability, market liquidity, currency volatility and accounting standards that differ from those of U.S. markets and may offer less protection to investors.
