

FORT WASHINGTON LARGE CAP FOCUSED EQUITY – 4Q2022

GENERAL INFORMATION

Inception Date: 10/01/2013
Total Assets: \$2.8 billion
Style: Large Cap Equity
Benchmark: S&P 500

STRATEGY OVERVIEW

- ▶ Investment approach that directly links valuation with barriers to entry
- ▶ Flexibility to shift portfolio through market cycle
- ▶ Take advantage of irrational human behavior and identify companies mispriced by the market
- ▶ High conviction strategy may promote alpha generation

PHILOSOPHY

Three aspects we believe generate competitive investment returns:

1. Pay as little as possible for future value creation
2. Invest in businesses capable of generating excess returns on capital
3. Invest in businesses with higher barriers to entry

ABOUT FORT WASHINGTON

- ▶ Founded in 1990; \$71.6 billion in current total assets under management¹
- ▶ Breadth of experience managing capital across a wide array of asset classes with a diverse client base
- ▶ Organizational hallmarks include: stability of teams, consistency of process, competitive performance, well-resourced teams, and alignment of interests

Composite inception and creation date: 10/01/13. ¹2013 returns are partial-year returns, reflecting the composite inception date of 10/01/13. ²The 3-Year annualized ex-post standard deviation is calculated using monthly gross-of-fee returns to measure the average deviations of returns from its mean. ³Dispersion is not calculated for years in which the composite contains five portfolios or less. Dispersion is calculated as the equal weighted standard deviation of gross-of-fee returns for those portfolios held in the composite during the entire period. The benchmark for this composite is the Standard and Poor's 500 Index. Past performance is not indicative of future results.

The Fort Washington Large Cap Focused Equity strategy is a large-cap concentrated, value oriented strategy that invests in businesses with a market capitalization greater than \$5 billion. The strategy invests in businesses with strong barriers to entry that have the capability of generating excess returns on capital. The strategy looks to take advantage of irrational human behavior by buying large cap securities that have been mispriced by the market. We will invest in companies that have limited absolute downside and large margin of safety on the upside. The objective of the Large Cap Focused Equity strategy is to outperform the S&P 500 Index over a full market cycle. All fee-paying, fully discretionary portfolios managed in the Large Cap Focused Equity style, with a minimum of \$3 million under our management, are included in this composite. Effective 10/26/18, the Large Cap Focused Equity strategy fee schedule is as follows: 0.55% on the first \$25 million, 0.45% on the next \$25 million, and 0.40% on additional amounts over \$50 million. The benchmark for this composite is the Standard and Poor's 500 Index. Portfolios in this composite include cash, cash equivalents, investment securities, interest and dividends. Cash is maintained, within each separately managed account segment, in accordance with our asset allocation ratio. The U.S. dollar is the base currency. The specific securities identified and described do not represent all of the securities purchased, sold, or recommended. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net of fee performance was calculated using the actual management fees charged. Individual portfolio returns are calculated on a daily valuation basis. Past performance is not indicative of future results. Fort Washington Investment Advisors, Inc. (Fort Washington), a wholly owned subsidiary of The Western and Southern Life Insurance Company, is a registered investment advisor and provides discretionary money management to a broad range of investors, including both institutional and individual investors. Assets under management include all portfolios managed by Fort Washington and exclude assets under management by and marketed as its Private Equity business unit. Fort Washington claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Fort Washington has been independently verified for the periods 7/1/94 - 12/31/21. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. To receive a complete list and description of composites, contact Fort Washington by phone at 888.244.8167, in writing at 303 Broadway, Suite 1200, Cincinnati, Ohio 45202, or online at fortwashington.com.

RISK DISCLOSURES

Fort Washington's Large Cap Focused Equity strategy invests in stocks of large-cap companies, which may be unable to respond quickly to new competitive challenges. The strategy invests in preferred stocks, which are relegated below bonds for payment should the issuer be liquidated. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing their price to decline. The strategy may focus its investments in specific sectors and therefore is subject to the risk that adverse circumstances will have greater impact on the fund than on the fund that does not do so. The strategy is non-diversified, which means that it may invest a greater percentage of its assets in the securities of a limited number of issuers and may be subject to greater risks.
