FORT WASHINGTON SECURITIZED TOTAL RETURN - 2Q2025

GENERAL INFORMATION

Inception Date: 01/01/2005 Strategy Assets: \$1.2 billion Style: Securitized - Investment

Benchmark: Bloomberg US Mortgage Backed Securities Index

VEHICLE AVAILABILITY

Separately Managed Account

STRATEGY OVERVIEW

- Relative value focus, emphasizing moderate risk opportunities in non-index sectors
- More stable duration and higher yield than traditional MBSoriented strategies
- Longer holding periods enable realization of yield advantage

PHILOSOPHY

We believe:

- Securitized products offer a superior risk/return profile versus competing fixed income assets
- Securitized products tend to have complex structures and uncertain cash flows, offering potential for inefficient markets and attractive risk-adjusted returns
- Strong front-end due diligence and back-end surveillance processes are necessary to navigate markets and manage risk
- Emphasizing the income component of return and focusing on high-spread, short-duration securities supports fundamental investing with a longer-term horizon

ABOUT FORT WASHINGTON

- Founded in 1990; \$90.5 billion in current total assets under management¹
- Organizational hallmarks include: stability of teams, consistency of process, competitive performance, deep resources, and alignment of interests

Number of Accounts	≤5	≤5	≤5	≤5	≤5	≤5	≤5	≤5	≤5	≤5	≤5
Composite Assets (\$ Millions)	\$386.9	\$371.4	\$347.7	\$328.4	\$380.0	\$367.9	\$398.3	\$234.7	\$230.0	\$149.5	\$105.8
Total Firm Assets (\$ Millions)	\$84,969	\$81,286	\$74,613	\$66,365	\$73,804	\$65,086	\$59,174	\$49,225	\$52,774	\$45,656	\$42,959

Composite inception date: 01/01/2005. The 3-Year annualized ex-post standard deviation is calculated using monthly gross-of-fee returns to measure the average deviations of returns from its mean. *Dispersion is not calculated for years in which the composite contains five portfolios or less. Dispersion is calculated as the equal weighted standard deviation of gross-of-fee returns for those portfolios held in the composite during the entire period. Past performance is not indicative of future results. The benchmark for this composite is the Bloomberg US Mortgage Backed Securities Index. After Bloomberg US Mortgage Backed Securities Index tacks fixed-rate agency mortgage-backed pass-through securities guaranteed by Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). The index is constructed by grouping individual TBA-deliverable MBS pools into aggregates or generics based on program, coupon, and vintage. The index accounts for interest payments by incorporating them into the total return calculation. Fort Washington's Securitized Total Return strategy seeks to achieve superior return on mortgage-elacked securities in the botal return of the Bloomberg Barclay's Mortgage index. Average quality to be investment grade. All fee-paying, fully discretionary, non-restricted portfolios managed in the Securitized Total Return style, with a minimum of \$15 million under our management, are included in this composite. The strategy's fee schedule is 0.30% on the first \$25 million and 0.25% on additional amounts over \$25 million. Portfolios in this composite include agency mortgage-backed securities, agency debentures, Treasuries and cash securities. Cash is maintained, within each separately managed account segment, in accordance with our asset allocation ratio. The U.S. dollar is the base currency. The specific securities identified and described do not represent all of the securities purchased, sold, or recommended. Returns are presented gross and net of management fees and include the applicable strategy shown. I

RISK DISCLOSURE

The Fort Washington Securitized Total Return strategy invests primarily in securitized asset instruments, including mortgage-backed securities, asset-backed securities and other securities. The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, or adverse investor sentiment. Investments in the strategy are subject to possible loss due to the financial failure of issuers of underlying securities and their inability to meet their debt obligations. When interest rates rise, the prices of fixed-income securities in the strategy will generally rise. The value of mortgage-related and asset backed securities will be influenced by factors affecting the real estate market and the assets underlying those securities. These securities are also subject to prepayment and extension risks and risk of default.
