

FORT WASHINGTON ULTRA SHORT DURATION – 4Q2025

GENERAL INFORMATION

Inception Date: 01/01/1995
Strategy Assets: \$1.3 Billion
Style: Cash Alternative
Emphasizing Securitized Credit
Benchmark: ICE BofAML
3-Month US Treasury Bill Index

VEHICLE AVAILABILITY

- Mutual Fund
- ETF
- Separately Managed Account

STRATEGY OVERVIEW

- Invests in high-quality (investment grade), high-cash flow bonds with emphasis on securitized products
- Buy-and-hold approach facilitates realization of complexity premium
- Seeks to keep duration less than a year to limit interest rate risk

PHILOSOPHY

We believe:

- In capturing complexity premium versus taking credit risk
- High cash flow and low spread duration are critical to managing volatility
- Certainty and short tenor of cash flow facilitates buy-and-hold strategy
- Structured securities offer best risk and return profile
- Specialization is required in increasingly complex markets

ABOUT

FORT WASHINGTON

- Founded in 1990; \$95.0 billion in current total assets under management¹
- Organizational hallmarks include: stability of teams, consistency of process, competitive performance, deep resources, and alignment of interests

Composite inception and creation date: 01/01/1995. ¹The 3-Year annualized ex-post standard deviation is calculated using monthly gross-of-fee returns to measure the average deviations of returns from its mean. ²Dispersion is not calculated for years in which the composite contains five portfolios or less. Dispersion is calculated as the equal weighted standard deviation of quarterly gross-of-fee returns for those portfolios held in the composite during the full measurement period. Past performance is not indicative of future results. The benchmark for this composite is the ICE BofAML 3-Month US Treasury Bill Index. The ICE BofAML 3-Month US Treasury Bill Index measures the performance of short-term U.S. Treasury bills with maturities of three months. The index accounts for interest payments by incorporating them into the total return calculation. Fort Washington's Ultra Short Duration Fixed Income strategy seeks to achieve superior return on short-term investments and to employ an active sector rotation process identifying relative value within the short-term marketplace. Typical securities utilized include government bonds, corporate bonds, commercial paper, municipal bonds, and asset-backed bonds. Portfolio characteristics include average maximum duration of one-year, maximum duration per security of 5 years with all securities rated investment grade at time of purchase. All fee-paying, fully discretionary portfolios managed in the Ultra Short Duration style, with a minimum of \$15 million under our management, are included in this composite. The strategy's fee schedule is 0.15% for separate accounts. Portfolios in this composite include cash, cash equivalents, investment securities, interest, and dividends. Cash is maintained, within each separately managed account segment, in accordance with our asset allocation ratio. The U.S. dollar is the base currency. The composite primarily invests in ultra short term, investment grade debt obligations, and its average effective portfolio duration will normally be one year or less. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net returns reflect the portfolio's gross return with the deduction of expenses and other costs associated with the management of the investments in the portfolio as well as the deduction of the highest advertised fee rate for the applicable strategy shown. Individual portfolio returns are calculated on a daily valuation basis. Prior to 01/01/1997, individual portfolio returns were calculated monthly using a time-weighted return method. Fort Washington Investment Advisors, Inc. (Fort Washington), a wholly owned subsidiary of The Western and Southern Life Insurance Company, is a registered investment advisor and provides discretionary money management to a broad range of investors, including both institutional and individual investors. Assets under management include all portfolios managed by Fort Washington and exclude assets managed by and marketed as its Private Equity business unit. Fort Washington claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. Fort Washington has been independently verified for the periods 07/01/1994-12/31/2024. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. To receive a complete list and description of composites, contact Fort Washington by phone at 888.244.8167, in writing at 303 Broadway, Suite 1200, Cincinnati, Ohio 45202, or online at fortwashington.com.

RISK DISCLOSURE

The Ultra Short Duration Fixed Income strategy invests in fixed-income securities which can experience reduced liquidity during certain market events, lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. The strategy invests in mortgage-backed securities and asset-backed securities which are subject to the risks of prepayment, defaults, changing interest rates and at times, the financial condition of the issuer. The strategy invests in repurchase agreements which are considered loans by the strategy and may suffer a loss of principal and interest in the event of counterparty defaults. The strategy invests in Collateralized Loan Obligations (CLOs) that have risks that largely depend on the type of underlying collateral and risks may include illiquidity, limited active market, the possibility that distributions from collateral securities will be insufficient to make interest or other payments, the potential for a decline in the quality of the collateral, and can bear the risk of default by the loans.
