J.P. Morgan Strategic BalancedSM Index

CHARTING A COURSE WITH MARQUIS[®]

Marquis SP, Marquis Centennial and Group Marquis Centennial¹ ("Marquis" annuities) combine growth potential and income guarantees. Among its allocation options are some tied to the **J.P. Morgan Strategic BalancedSM Index** (the Index). Marquis annuities, issued by The Lafayette Life Insurance Company, are deferred fixed indexed annuities. They credit interest based on changes in an index, which measures how markets or parts of markets perform.

AN INDEX DESIGNED FOR STABLE GROWTH

Marquis fixed indexed annuities offer one-, two- and three-year allocation options² that reflect the performance of the **J.P. Morgan Strategic BalancedSM Index**. Two components, one growth and one income, make up the rules-based Index:

- **High-Dividend Stocks | Invesco S&P 500[®] High Dividend Low Volatility ETF**
High-dividend stocks screened for volatility comprise the growth component of the Index. Using the 75 highest yielding stocks in the S&P 500[®], this ETF identifies the 50 least volatile. It then weights them by dividend yield. The ETF combines two investment themes: income and low volatility.
- **Dynamically Rebalanced Bonds | J.P. Morgan Total ReturnSM Index**
Employing a dynamic, momentum-based allocation approach, the Index combines traditional fixed income with opportunistic investing. It uses ETFs to allocate among 12 asset classes encompassing four market sectors (U.S. Treasuries, investment-grade credit, other government or agency bonds and other credit-based constituents). Bonds historically provide a measure of stability relative to the volatility of stocks.

AN INDEX WEIGHTED TO SEEK SMOOTHER RETURNS FOR INTEREST CREDITING

The **J.P. Morgan Strategic BalancedSM Index** rebalances between its stock and bond components on a daily basis. Rebalancing dissimilar asset classes may dampen risk and smooth returns in both rising and falling markets.

The Index targets a 6% volatility.³ Still, Index objectives may not be met and may not protect against market risk.

ABOUT MARQUIS[®] FIXED INDEXED ANNUITIES

Marquis SP, Marquis Centennial and Group Marquis Centennial are not securities. They do not participate in the stock market or any index. They are annuity contracts designed to help address your long-term retirement income needs. The **J.P. Morgan Strategic BalancedSM Index** allocation option is just one of the paths available to you. Talk to your financial professional to consider if this strategy may suit you.

² Two- and three-year options unavailable in New Jersey on Group Marquis Centennial (LL-12-DAG-1).

Seeking Smoother Returns for Your Retirement

ONE-, TWO- AND THREE-YEAR ALLOCATION OPTIONS

The **J.P. Morgan Strategic BalancedSM Index** allocation options credit any positive interest by measuring the Index value at two points in time (the start and end dates of the crediting period). The actual interest rate credited is the point-to-point return of the Index adjusted by a participation rate in the Marquis fixed indexed annuity contracts, which may be less than, equal to or greater than 100% (the minimum is 10%). The higher the participation rate, the better. A new participation rate is declared each crediting period. Typically, the longer the crediting period, the higher the participation rate.

Remember, you never participate in losses of the Index. And there's **no interest rate cap** imposed by Lafayette Life to limit the upside return of the allocation option. Your actual return will be limited by the participation rate if it is less than 100%.

HYPOTHETICAL PERFORMANCE: JANUARY 1, 2005-DECEMBER 31, 2022

The **J.P. Morgan Strategic BalancedSM Index** began on July 17, 2017, but how might it have performed had it been around since 2005? Shown below are hypothetical one-year returns for the Index.⁴

Annual Return	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
J.P. Morgan Strategic Balanced SM Index	-1.70%	12.54%	-3.43%	-2.66%	12.34%	11.94%	9.05%	4.15%	8.45%	13.36%	-1.75%	7.59%	7.97%	-6.77%	10.81%	-5.61%	5.06%	-8.48%
S&P 500 [®] Price Index	3.00%	13.62%	3.53%	-38.49%	23.45%	12.78%	0.00%	13.41%	29.60%	11.39%	-0.73%	9.54%	19.42%	-6.24%	28.88%	16.26%	26.89%	-19.44%

Hypothetical Index returns⁴ reflect performance of the Index only and not the participation rates associated with Marquis fixed indexed annuities. A participation rate below 100% will reduce returns and interest credited to Marquis fixed indexed annuities. Hypothetical Index returns are not indicative of future results. Back-tested performance information is solely hypothetical and for information purposes only. Index weights may not be optimal. A different combination may perform better. The Index is not actively managed. The Index tracks the excess returns of the portfolio over a cash rate and a 0.5% index fee. Hypothetical Index returns reflect this expense. Issuer is contractually bound to purchase the investments related to this option from J.P. Morgan. If the Index change over the crediting period is 0% or lower, account value is credited with 0%. Account value is credited at the end of the chosen period. Withdrawal charges reduce account value. Allocation options and crediting periods may be changed or eliminated in the future. If an index is eliminated or substantially changed by its sponsor, we will notify you and make a reasonable substitution.

³ Volatility is a measurement of changes in the Index's value using standard deviation. Volatility is monitored daily and, to the extent it's necessary to meet the target, the Index is partially uninvested.

⁴ Hypothetical back-tested data reflects application of Index methodology and selection of Index components with the benefit of hindsight. All performance data is hypothetical back-tested data using proxy performance for some underlying ETFs through April 28, 2016; hypothetical back-tested data using the actual performance of each underlying ETF from April 29, 2016, through July 16, 2017; and actual historical performance thereafter. When calculating the hypothetical back-tested performance of the Index, there were periods in which an ETF either did not exist or did not satisfy the minimum liquidity standards required for inclusion within the Index or the J.P. Morgan Total ReturnSM Index. In those instances, the performance of a related index (net of hypothetical expenses) was used as a proxy for that ETF. A proxy index's performance does not represent the actual historical performance of any ETF during the relevant periods. No hypothetical back-tested performance can completely account for the impact of financial risk in actual trading. Effective December 31, 2021, the 2-month and 3-month USD LIBOR constituents were replaced with the J.P. Morgan 2M and 3M Spread-Adjusted SOFR Indices, respectively. Many factors not accounted for can affect actual performance. Source: J.P. Morgan Securities LLC, January 2023.

Morgan Index, the Licensee, the Annuity Product or any Purchaser.

The J.P. Morgan Index has been designed and is compiled, calculated, maintained and sponsored by J.P. Morgan without regard to the Licensee, the Annuity Product or any Purchaser. The ability of the Licensee to make use of the J.P. Morgan Index may be terminated on short notice and it is the responsibility of the Licensee to provide for the consequences of that in the design of the Annuity Product. J.P. Morgan does not accept any legal obligation to take the needs of any person who may invest in an Annuity Product into account in designing, compiling, calculating, maintaining or sponsoring the J.P. Morgan Index or in any decision to cease doing so.

J.P. Morgan does not give any representation, warranty or undertaking, of any type (whether express or implied, statutory or otherwise) in relation to the J.P. Morgan Index, as to condition, satisfactory quality, performance or fitness for purpose or as to the results to be achieved by an investment in the Annuity Product or any data included in or omissions from the J.P. Morgan Index, or the use of the J.P. Morgan Index in connection with the Annuity Product or the veracity, currency, completeness or accuracy of the information on which the J.P. Morgan Index is based (and without limitation, J.P. Morgan accepts no liability to any Purchaser for any errors or omissions in that information or the results of any interruption to it and J.P. Morgan shall be under no obligation to advise any person of any such error, omission or interruption). To the extent any such representation, warranty or undertaking could be deemed to have been given by J.P. Morgan, it is excluded save to the extent that such exclusion is prohibited by law. To the fullest extent permitted by law, J.P. Morgan shall have no liability or responsibility to any person or entity (including, without limitation, to any Purchasers) for any losses, damages, costs, charges, expenses or other liabilities howsoever arising, including, without limitation, liability for any special, punitive, indirect or consequential damages (including loss of business or loss of profit, loss of time and loss of goodwill), even if notified of the possibility of the same, arising in connection with the design, compilation, calculation, maintenance or sponsoring of the J.P. Morgan Index or in connection with the Annuity Product.

The J.P. Morgan Index is the exclusive property of J.P. Morgan. J.P. Morgan is under no obligation to continue compiling, calculating, maintaining or sponsoring the J.P. Morgan Index and may delegate or transfer to a third party some or all of its functions in relation to the J.P. Morgan Index.

J.P. Morgan may independently issue or sponsor other indices or products that are similar to and may compete with the J.P. Morgan Index and the Annuity Product. J.P. Morgan may also transact in assets referenced in the J.P. Morgan Index (or in financial instruments such as derivatives that reference those assets). It is possible that these activities could have an effect (positive or negative) on the value of the J.P. Morgan Index and the Annuity Product.

No actual investment which allowed tracking of the performance of the J.P. Morgan Index was possible before July 17, 2017. Any hypothetical "back-tested" information provided herein is illustrative only and derived from proprietary models designed with the benefit of hindsight based on certain data (which may or may not correspond with the data that someone else would use to back-test the J.P. Morgan Indices) and assumptions and estimates (not all of which may be specified herein and which are subject to change without notice). The results obtained from different models, assumptions, estimates and/or data may be materially different from the results presented herein and such hypothetical "back-tested" information should not be considered indicative of the actual results that might be obtained from an investment or participation in a financial instrument or transaction referencing the J.P. Morgan Indices. J.P.
