

Touchstone Dynamic Allocation Fund

Sub-Advised by: Wilshire Associates Incorporated

Multi-Asset – Growth

1Q/2022

Fund Facts (As of 03/31/22)

Class	Inception Date	Symbol	CUSIP	Annual Fund Operating Expense Ratio*	
				Total	Net
A Shares	09/30/04	TSMAX	89154Q307	1.46%	1.07%
C Shares	09/30/04	TSMCX	89154Q406	2.91%	1.82%
Y Shares	12/09/05	TSMYX	89154Q505	1.45%	0.82%
Total Fund Assets	\$77.8 Million				

*Expense ratio is annualized. Data as of the current prospectus. Touchstone Advisors has contractually agreed to waive a portion of its fees and/or reimburse certain Fund expenses in order to limit certain annual fund operating expenses (excluding Acquired Fund Fees and Expenses "AFFE" and other expenses, if any) to 0.49% for Class A Shares, 1.24% for Class C Shares and 0.24% for Class Y Shares. These expense limitations will remain in effect until at least 04/29/23.

Share class availability differs by firm.

Annualized Total Returns** (As of 03/31/22)

Class	1Q22	YTD	1 Year	3 Year	5 Year	10 Year	Inception

[^]Benchmark - MSCI All Country World Index¹

^{^^}Benchmark - Bloomberg U.S. Universal Index²

Performance data quoted represents past performance, which is no guarantee of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data given. **For performance information current to the most recent month-end, visit TouchstoneInvestments.com/mutual-funds.** From time to time, the investment advisor may waive some fees and/or reimburse expenses, which if not waived or reimbursed, will lower performance. Performance by share class will differ due to differences in sales charges and class expenses. Calendar year returns of the Fund and the Benchmark do not include the effects of the applicable sales charge which would lower returns. Returns assume reinvestment of all distributions. Returns are not annualized for periods less than one year.

Morningstar Ratings (As of 03/31/22)

	Overall	3 Year	5 Year	10 Year
A Shares	★★★★	★★★★	★★★★	★★★★
C Shares	★★	★★	★★	★★
Y Shares	★★★★	★★★★	★★★★	★★★★
Funds in World Allocation Category	—	407	361	251

The Morningstar Rating[™] for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating[™] does not include any adjustment for sales load. The top 10% of products in each product category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods.

Class A Shares star ratings do not include any front-end sales load and are intended for those investors who have access to such purchase terms.

****The performance presented for Class Y Shares combines the performance of an older class of shares (A Shares) from the Fund's inception, 09/30/04, with the performance since the inception date of each share class.**

Objective

The Fund seeks to provide investors with capital appreciation.

Investment Style

- This "fund of funds" primarily invests in a diversified portfolio of underlying equity and fixed income funds. These underlying funds, in turn, invest in a variety of U.S. and foreign equity and fixed income securities
- Under normal circumstances, the Fund (through its investment in underlying funds) will invest at least 40% of its portfolio in securities of issuers outside of the U.S.
- The majority of the underlying funds in which the Fund invests will be affiliated funds; however the Fund has the ability to invest in unaffiliated underlying funds
- The Fund's sub-advisor seeks to develop an optimal model allocation among underlying funds that seeks to provide capital appreciation through global exposure to a broad array of asset classes and investment strategies
- Under normal circumstances, the Fund expects to allocate its assets among equity and fixed income funds as follows: Equity Fund Allocation: 45-75%; Fixed Income Fund Allocation: 25-55%

A Word About Risk

The value of an investment in the Fund is based on the performance of the underlying funds in which it invests and the allocation of its assets among those funds. The underlying funds may change their investment goals, policies or practices and there can be no assurance that the underlying funds will achieve their respective investment goals. Because the Fund invests in mutual funds, shareholders indirectly bear a proportionate share of the expenses charged by the underlying funds in which it invests. The principal risks of an investment in the Fund include the principal risks of investing in the underlying funds. The Fund's ability to achieve its investment goal depends upon the sub-advisor's skill in selecting the best mix of underlying funds. The Advisor engages a sub-advisor to make investment decisions for the Fund's portfolio; it may be unable to identify and retain a sub-advisor who achieves superior investment returns relative to other similar sub-advisors. Events in the U.S. and global financial markets, including actions taken to stimulate or stabilize economic growth may at times result in unusually high market volatility, which could negatively impact Fund performance and cause it to experience illiquidity, shareholder redemptions, or other potentially adverse effects. Financial institutions could suffer losses if interest rates rise or economic conditions deteriorate. The principal risks of an investment in the Fund include the principal risks of investing in the underlying funds in addition to those of the Fund. The Fund invests in equities which are subject to market volatility and loss. The Fund invests in foreign securities, foreign depositary receipts, emerging markets and frontier markets securities which carry the associated risks of economic and political instability, market liquidity, currency volatility and differences in accounting standards that differ from those of U.S. markets and offer less protection to investors. The Fund invests in fixed-income securities which can lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. The Fund invests in non-investment grade debt securities which are considered speculative with respect to the issuers' ability to make timely payments of interest and principal, may lack liquidity and has had more frequent and larger price changes than other debt securities. The Fund invests in derivatives which may expose the Fund to additional risk than directly investing in securities and may lack a liquid market, are subject to counterparty risk and leverage risk which could result in increased volatility of returns as well as losses. Liquidity risk may exist when particular investments are difficult to purchase or sell, which can reduce an underlying fund's return. Leverage can create an interest expense that may lower the Fund's overall returns. There can be no guarantee that a leveraging strategy will be successful. Current and future portfolio holdings are subject to change.
