

Touchstone Dynamic Diversified Income Fund

Sub-Advised by: Wilshire Associates Incorporated

Multi-Asset – Income

1Q/2019

Fund Facts (As of 03/31/19)

Class	Inception Date	Symbol	CUSIP	Annual Fund Operating Expense Ratio*	
				Total	Net
A Shares	09/30/04	TBAAX	89154Q794	1.66%	1.22%
C Shares	09/30/04	TBACX	89154Q786	2.45%	1.97%
Y Shares	12/09/05	TBAYX	89154Q778	1.76%	0.97%
Total Fund Assets	\$45.7 Million				

*Expense ratio is annualized. Data as of the current prospectus. Touchstone Advisors has contractually agreed to waive a portion of its fees and/or reimburse certain Fund expenses in order to limit certain annual fund operating expenses (excluding Acquired Fund Fees and Expenses "AFFE" and other expenses, if any) to 0.49% for Class A Shares, 1.24% for Class C Shares and 0.24% for Class Y Shares. These expense limitations will remain in effect until at least 04/29/20.

Annualized Total Returns** (As of 03/31/19)

Class	1Q19	YTD	1 Year	3 Year	5 Year	10 Year	Inception

[^]Benchmark - Bloomberg Barclays U.S. Aggregate Bond Index¹

^{^^}Benchmark - MSCI All Country World Index²

Performance data quoted represents past performance, which is no guarantee of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data given. For performance information current to the most recent month-end, visit TouchstoneInvestments.com/mutual-funds. From time to time, the investment advisor may waive some fees and/or reimburse expenses, which if not waived or reimbursed, will lower performance. Performance by share class will differ due to differences in sales charges and class expenses. Calendar year returns of the Fund and the Benchmark do not include the effects of the applicable sales charge which would lower returns. Returns assume reinvestment of all distributions. Returns are not annualized for periods less than one year.

Yield - Class A Shares (As of 03/31/19)

Touchstone Dynamic Diversified Income Fund	
30-Day SEC Yield	3.39%
30-Day Unsubsidized [†] SEC Yield	2.99%

[†]Unsubsidized is calculated without expense waivers. The 30-Day SEC Yield is calculated by dividing the net investment income per share (as defined by industry regulations) earned by a fund over a 30-day period by the maximum public offering price. This number is then annualized. The 30-Day SEC Yield reflects the rate at which a fund is earning income on its current portfolio of securities and does not necessarily reflect income actually earned and distributed by a fund and, therefore, may not be correlated with a fund's past distributions actually paid to shareholders.

Morningstar Ratings (As of 03/31/19)

	Overall	3 Year	5 Year	10 Year
A Shares	★★★★	★★★	★★★	★★★
C Shares	★★★★	★★	★★	★★★★
Y Shares	★★★★	★★★	★★★	★★★★
Funds in Allocation--30% to 50% Equity Category	—	488	386	268

The Morningstar Rating[™] for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating[™] does not include any adjustment for sales load. The top 10% of products in each product category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods.

The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

Class A Shares star ratings do not include any front-end sales load and are intended for those investors who have access to such purchase terms.

**The performance presented for Class Y Shares combines the performance of an older class of shares (A Shares) from the Fund's inception, 09/30/04, with the performance since the inception date of each share class.

Objective

The Fund seeks to provide investors with current income.

Investment Style

- This "fund of funds" primarily invests in a diversified portfolio of underlying fixed income and equity-income oriented funds. These underlying funds, in turn, invest in a variety of U.S. and foreign equity and fixed income securities
- The majority of the underlying funds in which the Fund invests will be affiliated funds; however the Fund has the ability to invest in unaffiliated underlying funds
- The Fund's sub-advisor seeks to develop an optimal model allocation among underlying funds that seeks to maximize "income efficiency," or yield achieved per unit of risk. It is dynamically managed as yield and volatility environments change
- Under normal circumstances, the Fund expects to allocate its assets among equity and fixed income funds as follows: Equity Fund Allocation: 25-55%; Fixed Income Fund Allocation: 45-75%

Sub-Advisor

Wilshire Associates Incorporated

A Word About Risk

The value of an investment in the Fund is based on the performance of the underlying funds in which it invests and the allocation of its assets among those funds. The Fund bears a proportionate amount of the expenses charged by the underlying funds. The Fund's ability to achieve its investment goal depends upon the sub-advisor's skill in selecting the best mix of underlying funds. The principal risks of an investment in the Fund include the principal risks of investing in the underlying funds in addition to those of the Fund. The Fund invests in equities which are subject to market volatility and loss. The Fund invests in foreign securities, foreign depositary receipts and emerging markets securities which carry the associated risks of economic and political instability, market liquidity, currency volatility and differences in accounting standards. The Fund invests in debt securities which can lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. The Fund invests in non-investment grade debt securities which are considered speculative with respect to the issuers' ability to make timely payments of interest and principal, may lack liquidity and has had more frequent and larger price changes than other debt securities. The Fund invests in derivatives which may expose the Fund to additional risk than directly investing in securities and may lack a liquid market, are subject to counterparty risk and leverage risk which could result in increased volatility of returns as well as losses. Liquidity risk may exist when particular investments are difficult to purchase or sell, which can reduce an underlying fund's return. Leverage can create an interest expense that may lower the Fund's overall returns. There can be no guarantee that a leveraging strategy will be successful. Current and future portfolio holdings are subject to risk. The advisor engages the sub-advisor to manage the Fund's portfolio; the sub-advisor's judgment may impact the Fund's performance. The Fund is non-diversified, which means that it may invest a greater percentage of its assets in the securities of a limited number of issuers and may be subject to greater risks. The Fund may experience higher portfolio turnover which may lead to increased fund expenses, lower investment returns and higher short-term capital gains taxable to shareholders. The Advisor engages a sub-advisor to make investment decisions for the Fund's portfolio; it may be unable to identify and retain a sub-advisor who achieves superior investment returns relative to other similar sub-advisors.
