Benchmark - MSCI ACWI Ex-U.S. Index

The MSCI ACWI ex-U.S. Index is an unmanaged, capitalization weighted index composed of companies representing both developed and emerging markets excluding the U.S.

The benchmark index mentioned is an unmanaged statistical composite of stock or bond market performance. Investing in an index is not possible. Index returns do not reflect any fees, expenses or sales charges.

Performance data quoted represents past performance, which is no guarantee of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data given. For performance information current to the most recent month-end, visit <https://www.westernsouthern.com/touchstone/etfs/dynamic-international-etf>. From time to time, the investment advisor may waive some fees and/or reimburse expenses, which if not waived or reimbursed, will lower performance. Returns assume reinvestment of all distributions. Returns are not annualized for periods less than one year. Investing involves risk, principal loss is possible. ETFs may trade at a premium or discount to their net asset value. Market price returns are based on the consolidated market price and do not represent the returns you would receive if you traded shares at other times.

## Why Invest

The Fund seeks capital appreciation.

## Investment Style

- Invests primarily in equity securities of non-U.S. companies domiciled in both developed and emerging markets
- Employs an adaptive quantitative investment process, the Dynamic Alpha Stock Selection Model<sup>®</sup>, to build equity portfolios that adapt to market conditions
- Believes that investor attitudes towards key investment risk change over the course of a market cycle and are a key determinant in explaining security returns
- Primarily invests in a fully transparent portfolio that will generally hold between 100 - 140 names

## Fund Characteristics

	Fund	Benchmark
Total Number of Holdings	112	1977
Active Share	78	
Weighted average market capitalization (\$ billion)	\$152.5	\$168.3
Median market capitalization (\$ billion)	\$34.2	\$13.8
P/E (wtd. Harmonic avg.)	18.1x	19.2x
P/B (wtd. Harmonic avg.)	2.2x	2.2x
Portfolio Turnover Rate	67%	

*Active Share measures the percentage of the Fund's holdings that differ from those of the benchmark. It is calculated by taking the sum of the absolute difference between all of the holdings and weights in the portfolio and those of the benchmark holdings and weights and dividing the result by two.*

*The portfolio turnover rate is annualized as of 12/31/2025. Subject to change. The Weighted Harmonic Average measures the valuation of the portfolio as a whole. For price/earnings ratio, it is the ratio of the portfolio's total market value in equities to its share of the underlying stocks' earnings. For price/book ratio, it is the ratio of the portfolio's total market value in equities to its share of the underlying book value. This method evaluates the entire portfolio like a single stock and it minimizes the impact of outliers. Total number of holdings includes cash equivalents, but excludes currencies.*

## A Word About Risk

The Fund invests in equities which are subject to market volatility and loss. The Fund invests in preferred stocks which are relegated below bonds for payment should the issuer be liquidated. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing their price to decline. The Fund invests in foreign securities, including depositary receipts, such as American Depositary Receipts, Global Depositary Receipts, and European Depositary Receipts, which carry the associated risks of economic and political instability, market liquidity, currency volatility, and accounting standards that differ from those of U.S. markets and may offer less protection to investors.

The Advisor engages a sub-advisor to make investment decisions for the Fund's portfolio; it may be unable to identify and retain a sub-advisor who achieves superior investment returns relative to other similar sub-advisors. Events in the U.S. and global financial markets, including actions taken to stimulate or stabilize economic growth may at times result in unusually high market volatility, which could negatively impact Fund performance and cause it to experience illiquidity, shareholder redemptions, or other potentially adverse effects. Financial institutions could suffer losses if interest rates rise or economic conditions deteriorate. The Fund uses proprietary statistical analyses and models to construct the portfolio, models can perform differently than the market as a whole. The Fund may be more or less exposed to a risk factor than its individual holdings. Quantitative models are subject to technical issues which could adversely affect their effectiveness or predictive value.

The Fund's investments in other investment companies will be subject to substantially the same risks as those associated with the direct ownership of the securities comprising the portfolios of such investment companies, and the value of the Fund's investment will fluctuate in response to the performance of such portfolios. In addition, if the Fund acquires shares of investment companies, shareholders of the Fund will bear their proportionate share of the fees and expenses of the Fund and, indirectly, the fees and expenses of the investment companies or ETFs. Current and future portfolio holdings are subject to change.

Please consider the investment objectives, risks, charges and expenses of the ETF carefully before investing.
