

Touchstone Investments

At Touchstone, we recognize that not all fund companies are created equal. Our commitment to being Distinctively Active means:

- We apply an integrated and rigorous approach for identifying and partnering with highly-skilled asset managers who act in a sub-advisory capacity
- Each sub-adviser's disciplined investment process and employment of active management provide the differentiation required for robust portfolio construction
- We provide unique perspectives and collaborate with industry veterans and our sub-advisers to bring you their expertise and comprehensive thoughts on investment topics relevant in the current environment, which can be important contributors to investing success

Sub-Advised by Sands Capital Management, LLC

- Identifies leading companies with dramatic wealth creation potential, focusing on six key investment criteria:
 - Sustainable, above-average earnings growth
 - Leadership position in a promising business space
 - Significant competitive advantages
 - Clear mission and value-added focus
 - Financial strength
 - Rational stock market valuation

Touchstone Actively Managed ETFs:

- Offer Distinctively Active investment strategies believed to have the potential to provide excess returns and complement most investment portfolios
- Seek to reduce unintended risks and offer the flexibility to capture upside potential and limit downside risk relative to an index
- Provide the potential for a more tax-efficient, cost competitive and transparent way to access Touchstone investment strategies with no investment minimum

Investment Overview

The Fund seeks capital appreciation.

Investment Strategy

- The Fund invests primarily in common stocks of U.S. companies that have above-average potential for revenue or earnings growth.
- The Fund emphasizes investments in large and mid capitalization growth companies. The weighted-average market capitalization of these companies is generally in excess of \$25 billion, and the Fund generally does not invest in companies that have a market capitalization of less than \$2 billion at the time of purchase.
- The Fund will typically own between 25 and 35 companies.

A Word About Risk

The Fund invests in equities which are subject to market volatility and loss. The Fund invests in stocks of large-cap companies which may be unable to respond quickly to new competitive challenges. The Fund invests in stocks of mid-cap companies which may be subject to more erratic market movements than stocks of larger, more established companies. The Fund invests in growth stocks which may be more volatile than investing in other stocks and may underperform when value investing is in favor.

Touchstone exchange-traded funds (ETFs) are actively managed and do not seek to replicate a specific index. ETFs are bought and sold through an exchange at the then current market price, not net asset value (NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV when traded on an exchange. Brokerage commissions will reduce returns. There can be no guarantee that an active market for ETFs will develop or be maintained, or that the ETF's listing will continue or remain unchanged. The Adviser engages a sub-adviser to make investment decisions for the Fund's portfolio; it may be unable to identify and retain a sub-adviser who achieves superior investment returns relative to other similar sub-advisers.

The sub-adviser considers ESG factors that it deems relevant or additive along with other material factors. The ESG criteria may cause the Fund to forgo opportunities to buy certain securities and/or gain exposure to certain industries, sectors, regions and countries. The Fund may be required to sell a security when it could be disadvantageous to do so. Events in the U.S. and global financial markets, including actions taken to stimulate or stabilize economic growth may at times result in unusually high market volatility, which could negatively impact Fund performance and cause it to experience illiquidity, shareholder redemptions, or other potentially adverse effects. Banks and financial services companies could suffer losses if interest rates rise or economic conditions deteriorate. The Fund is non-diversified, which means that it may invest a greater percentage of its assets in the securities of a limited number of issuers and may be subject to greater risks.

The Fund may focus its investments in specific sectors and therefore is subject to the risk that adverse circumstances will have greater impact on the fund than on the fund that does not do so. The Fund's service providers are susceptible to cybersecurity risks that could result in losses to a Fund and its shareholders. Cybersecurity incidents could affect issuers in which a Fund invests, thereby causing the Fund's investments to lose value. Current and future portfolio holdings are subject to change.
