Benchmark - Russell 3000® Index

The Russell 3000 Index measures the performance of the the 3000 largest U.S. companies based on total market capitalization which represents approximately 98% of the investable U.S. equity market.

The benchmark index mentioned is an unmanaged statistical composite of stock or bond market performance. Investing in an index is not possible. Index returns do not reflect any fees, expenses or sales charges.

Performance data quoted represents past performance, which is no guarantee of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data given. **For performance information current to the most recent month-end, visit [TouchstoneInvestments.com/mutual-funds](https://www.touchstoneinvestments.com/mutual-funds).** From time to time, the investment advisor may waive some fees and/or reimburse expenses, which if not waived or reimbursed, will lower performance. Performance by share class will differ due to differences in class expenses. Returns assume reinvestment of all distributions. Returns are not annualized for periods less than one year.

The performance presented combines the performance of the oldest share class from the Fund's inception with the performance since the inception date of each share class.

The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating™ does not include any adjustments for sales load. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3, 5, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36–59 months of total returns, 60% 5-year rating/40% 3-year rating for 60–119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. Class A Share star ratings do not include any front-end sales load and are intended for those investors who have access to such purchase terms. ©2026 Morningstar, Inc. All Rights Reserved. Portfolio Turnover Rate	5%	

Active Share measures the percentage of the Fund's holdings that differ from those of the benchmark. It is calculated by taking the sum of the absolute difference between all of the holdings and weights in the portfolio and those of the benchmark holdings and weights and dividing the result by two. The portfolio turnover rate is annualized as of 03/31/2025. Subject to change. The Weighted Harmonic Average measures the valuation of the portfolio as a whole. For price/earnings ratio, it is the ratio of the portfolio's total market value in equities to its share of the underlying stocks' earnings. For price/book ratio, it is the ratio of the portfolio's total market value in equities to its share of the underlying book value. This method evaluates the entire portfolio like a single stock and it minimizes the impact of outliers. Total number of holdings includes cash equivalents, but excludes currencies.

A Word About Risk

The Fund invests in equities which are subject to market volatility and loss. The Fund invests in stocks of large-cap companies which may be unable to respond quickly to new competitive challenges. The Fund invests in stocks of small- and mid-cap companies, which may be subject to more erratic market movements than stocks of larger, more established companies. The Fund invests in preferred stocks which are relegated below bonds for payment should the issuer be liquidated. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing their price to decline. The Fund invests in foreign securities, including depositary receipts, such as American Depositary Receipts, Global Depositary Receipts, and European Depositary Receipts, which carry the associated risks of economic and political instability, market liquidity, currency volatility and accounting standards that differ from those of U.S. markets and may offer less protection to investors. The Fund invests in emerging markets securities which are more likely to experience turmoil or rapid changes in market or economic conditions than developed countries. The Fund may focus its investments in a particular industry and/or market sector which may increase the Fund's volatility and magnify its effects on total return. The Advisor engages a sub-advisor to make investment decisions for the Fund's portfolio; it may be unable to identify and retain a sub-advisor who achieves superior investment returns relative to other similar sub-advisors. Events in the U.S. and global financial markets, including actions taken to stimulate or stabilize economic growth may at times result in unusually high market volatility, which could negatively impact Fund performance and cause it to experience illiquidity, shareholder redemptions, or other potentially adverse effects. Banks and financial services companies could suffer losses if interest rates rise or economic conditions deteriorate. The Fund is nondiversified, which means that it may invest a greater percentage of its assets in the securities of a limited number of issuers and may be subject to greater risks. Current and future portfolio holdings are subject to change.
