Taxable Fixed Income

3Q/2018

Fund Facts (As of 09/30/18)

Class	Inception Date	Symbol	CUSIP	Annual Fund Operating Expense Ratio*	
				Total	Net
A Shares	10/03/94	TOBAX	89154W502	1.18%	0.90%
C Shares	10/03/94	TODCX	89154W601	2.18%	1.65%
Y Shares	04/12/12	TOBYX	89154W791	0.86%	0.65%
INST Shares	04/12/12	TOBIX	89154W783	0.87%	0.57%
Total Fund Assets	\$361.5 Million				

*Expense ratio is annualized. Data as of the current prospectus. Touchstone Advisors has contractually agreed to waive a portion of its fees and/or reimburse certain Fund expenses in order to limit certain annual fund operating expenses (excluding Acquired Fund Fees and Expenses "AFFE" and other expenses, if any) to 0.90% for Class A Shares, 1.65% for Class C Shares, 0.65% for Class Y Shares and 0.57% for Class INST Shares. These expense limitations will remain in effect until at least 10/26/19.

Annualized Total Returns** (As of 09/30/18)

Class	3Q18	YTD	1 Year	3 Year	5 Year	10 Year	Inception
Including Max Sales Charge

¹Benchmark - Bloomberg Barclays U.S. Aggregate Bond Index¹

Performance data quoted represents past performance, which is no guarantee of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data given. **For performance information current to the most recent month-end, visit TouchstoneInvestments.com/pricing-performance.** From time to time, the investment advisor may waive some fees and/or reimburse expenses, which if not waived or reimbursed, will lower performance. Performance by share class will differ due to differences in sales charges and class expenses. Calendar year returns of the Fund and the Benchmark do not include the effects of the applicable sales charge which would lower returns. Returns assume reinvestment of all distributions. Returns are not annualized for periods less than one year.

Yield - A Shares (As of 09/30/18)

	Touchstone Active Bond Fund
30-Day SEC Yield	2.49%
30-Day Unsubsidized [†] SEC Yield	2.61%

[†]Unsubsidized is calculated without expense waivers. **The 30-Day SEC Yield** is calculated by dividing the net investment income per share (as defined by industry regulations) earned by a fund over a 30-day period by the maximum public offering price. This number is then annualized. **The 30-Day SEC Yield** reflects the rate at which a fund is earning income on its current portfolio of securities and does not necessarily reflect income actually earned and distributed by a fund and, therefore, may not be correlated with a fund's past distributions actually paid to shareholders.

Morningstar Ratings (As of 09/30/18)

	Overall	3 Year	5 Year	10 Year
A Shares	★★★	★★★★	★★★	★★★
C Shares	★★★	★★★	★★	★★★
Y Shares	★★★★	★★★★	★★★★	★★★★
INST Shares	★★★★	★★★★	★★★★	★★★★
Funds in Intermediate-Term Bond Category	—	902	796	577

The Morningstar Rating[™] for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods.

Class A Shares star ratings do not include any front-end sales load and are intended for those investors who have access to such purchase terms.

****The performance presented for Class Y and INST Shares combines the performance of an older class of shares (A Shares) from the Fund's inception, 10/03/94, with the performance since the inception date of each share class.**

Objective

The Fund seeks to provide as high a level of current income as is consistent with the preservation of capital by investing primarily in bonds.

Investment Style

- Evaluates overall investment opportunities and risks in the different sectors of the fixed income securities market
- Assesses the economic environment and recent developments occurring in the bond market to set specific duration levels, yield-curve structures, sector weights and credit-quality targets
- Utilizes a disciplined sector allocation process in an effort to build a broadly diversified portfolio of bonds

To obtain a prospectus or a summary prospectus, contact your financial advisor or download and/or request one at TouchstoneInvestments.com/literature-center or call Touchstone at 800.638.8194. Please read the prospectus and/or summary prospectus carefully before investing.

The indexes mentioned are unmanaged statistical composites of stock market or bond market performance. Investing in an index is not possible.

¹The Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged index comprised of U.S. investment grade, fixed rate bond market securities, including government, government agency, corporate and mortgage-backed securities between one and ten years.

A Word About Risk

The Fund invests in debt securities which can lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. When interest rates rise, the price of debt securities generally falls. Longer term securities are generally more volatile. The Fund invests in investment grade debt securities which may be downgraded by a Nationally Recognized Statistical Rating Organization (NRSRO) to below investment grade status. The Fund invests in non-investment grade debt securities which are considered speculative with respect to the issuers' ability to make timely payments of interest and principal, may lack liquidity and has had more frequent and larger price changes than other debt securities. The Fund invests in U.S. government and agency securities which are neither issued nor guaranteed by the U.S. Treasury and are not guaranteed against price movements due to changing interest rates. The Fund invests in mortgage-backed securities and asset-backed securities which are subject to the risks of prepayment, defaults, changing interest rates and at times, the financial condition of the issuer. The Fund invests in mortgage dollar rolls which involve increased risk and volatility, as the securities the Fund is required to repurchase may be worth less than the securities that the Fund originally held. The Fund invests in foreign securities which carry the associated risks of economic and political instability, market liquidity, currency volatility and differences in accounting standards. The Fund invests in emerging markets securities which are more likely to experience turmoil or rapid changes in market or economic conditions than developed countries. The fund invests in sovereign debt securities which are issued by foreign governments whose respective economies could have an important effect on their ability or willingness to service their debt which could affect the value of the securities. The Fund invests in derivatives such as forward currency exchange contracts, futures contracts, options and swap agreements. Derivatives can be highly volatile, illiquid and difficult to value, subject to counterparty and leverage risks and there is risk that changes in the value of a derivative held by the Fund will not correlate with the Fund's other investments. Gains or losses from speculative positions in a derivative may be much greater than the original cost and potential losses may be substantial. The Fund may experience higher portfolio turnover which may lead to increased fund expenses, lower investment returns and higher short-term capital gains taxable to shareholders. Current and future portfolio holdings are subject to risk. The advisor engages the sub-advisor to manage the Fund's portfolio; the sub-advisor's judgment may impact the Fund's performance.
