Report of Independent Auditors

The Board of Directors
Western & Southern Financial Group, Inc.

Opinion

We have audited the consolidated financial statements of Western & Southern Financial Group, Inc. (the Company), which comprise the consolidated balance sheets as of December 31, 2024 and 2023, and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the years then ended, and the related notes (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2024 and 2023, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, and design and perform audit procedures responsive to those risks. Such procedures
 include examining, on a test basis, evidence regarding the amounts and disclosures in the financial
 statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Notes to Consolidated Financial Statements

December 31, 2024

1. Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

Western & Southern Financial Group, Inc. (Western & Southern) is a wholly-owned subsidiary of Western & Southern Mutual Holding Company (Mutual Holding). Mutual Holding is an Ohio-domiciled mutual insurance holding company organized pursuant to the plan of reorganization of The Western and Southern Life Insurance Company (WSLIC) by which WSLIC converted from a mutual life insurance company to a stock life insurance company under a mutual insurance holding company structure pursuant to the Ohio Revised Code. Western & Southern and Mutual Holding were formed on the effective date of the conversion, September 19, 2000. Upon the conversion, WSLIC became a wholly-owned subsidiary of Western & Southern.

Western & Southern and its subsidiaries (collectively referred to herein as the Company) provide a broad array of insurance and financial products and services through a multi-channel distribution system. The Company provides a variety of traditional and non-traditional life insurance products, including whole life products, fixed and variable annuities, universal life contracts and other types of accumulation and protection products. The Company has two insurance subsidiaries, WSLIC and Lafayette Life Insurance Company (Lafayette Life). WSLIC has a number of direct and indirect insurance subsidiaries consisting of Western-Southern Life Assurance Company (WSLAC), Columbus Life Insurance Company (Columbus Life), Integrity Life Insurance Company (National Integrity) and Gerber Life Insurance Company (Gerber Life). The Company sells its products and services to individuals of all income levels in all 50 states, the District of Columbia and Guam.

The Company's primary non-life insurance operations include (i) the Company's registered broker-dealer affiliates, Touchstone Securities, Inc. and W&S Brokerage Services, Inc.; (ii) the Company's investment advisory affiliates, Fort Washington Investment Advisors, Inc. and Touchstone Advisors, Inc.; (iii) the Company's real estate management affiliate, Eagle Realty Group, LLC; and (iv) the Company's insurance agency and third party administrator, Gerber Life Agency, LLC.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (GAAP).

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Closed Blocks

The Company operates two closed blocks. In conjunction with the formation of Mutual Holding, the Company formed a closed block for the benefit of participating individual ordinary and weekly premium industrial life insurance policyholders of WSLIC. A second closed block was formed as a result of the Company's 2005 merger with Lafayette Life for the benefit of participating life insurance policyholders of Lafayette Life.

The assets and liabilities allocated to the closed blocks are recorded in the Company's financial statements on the same basis as similar assets and liabilities. The carrying amounts of liabilities allocated to the closed blocks in excess of the carrying amounts of assets allocated to the closed blocks (adjusted to eliminate the impact of accumulated other comprehensive income) represent the maximum future earnings the Company may record into income over the duration of the closed blocks. The emergence of the earnings over the lives of the closed blocks has been developed through actuarial calculations and in conformity with related regulatory requirements.

If cumulative actual earnings are greater than expected, only expected earnings will be recognized in income. The excess earnings are recorded as a policyholder dividend obligation and will be paid to policyholders of the closed blocks through increased dividends unless offset by future results below expectations. If cumulative actual earnings are less than expected, only actual earnings will be recognized in income.

Changes in the policyholder dividend obligation arising from ordinary operations within the closed blocks are included in policy benefits in the consolidated statements of income. Changes in the policyholder dividend obligation arising from realized gains (losses) within the closed blocks are included in net investment gains (losses) in the consolidated statements of income.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries and, if applicable, variable interest entities (VIEs) in which the Company is the primary beneficiary and voting interest entities (VOEs) in which the Company controls the majority of voting interests. Intercompany balances and transactions have been eliminated.

A VIE is an entity that either has equity investors that lack certain essential characteristics of a controlling financial interest, including substantive voting rights, the obligation to absorb the entity's expected losses, or the rights to receive the entity's expected residual returns, or has equity investors that do not provide sufficient financial resources for the entity to support its

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

activities. A VIE is consolidated by the variable interest holder that is determined to be the primary beneficiary based upon qualitative and/or quantitative analysis. The Company is required to assess the need to consolidate a VIE depending upon the characteristics of the entity. The Company performs the assessment of whether the Company is the primary beneficiary of a VIE on an ongoing basis. See Note 3, Variable Interest Entities, for further discussion of the Company's relationship with VIEs.

Investments

The Company's debt and equity securities are reported at their estimated fair values. Debt securities are classified in one of two categories at purchase: available-for-sale or trading. See Note 8, Fair Values of Financial Instruments, for policies related to the determination of fair values. The cost of debt securities classified as available-for-sale is adjusted for amortization of premiums and accretion of discounts, both computed using the interest method. Unrealized investment gains and losses on available-for-sale securities are recorded as a separate component of other comprehensive income, net of policyholder-related amounts and deferred income taxes. The cost of available-for-sale debt securities is adjusted for impairments in value in the event the Company intends to sell the security or determines it is more likely than not it will be required to sell the security prior to the recovery of its amortized cost basis. The Company also reviews available-for-sale debt securities to determine if there is a credit related impairment of the value. In the event of a credit related impairment, the Company records a valuation allowance for the credit loss, limited to the extent that amortized cost of the available-for-sale debt security exceeds fair value. These adjustments are recorded as realized losses on investments in the period the determination is made. See further discussion in Note 2, Investments. Equity securities, excluding those that back certain employee benefit plans, and debt trading securities are carried at fair value and changes in fair value are recorded in net investment gains (losses) as they occur. Realized gains and losses on the sale or maturity of investments are based upon specific identification of the investments sold or matured and do not include amounts allocated to separate accounts. Equity securities used in certain employee benefit plans are accounted for at fair value with changes in fair value recorded as net investment income.

Short-term investments, other than cash and cash equivalents, are those investments used in the Company's investing activities and with a maturity of less than one year. These consist primarily of debt securities, commercial paper and money market funds. Short-term investments are reported at their estimated fair values.

Mortgage loans on real estate, that are not held for the purposes of resale, are carried at amortized cost less an allowance for credit loss. Interest income is accrued on the principal balance of the loan based on the loan's contractual interest rate. Loans are evaluated for or placed on nonaccrual status when there is concern regarding the collectability of future payments or

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

when a loan has matured without being paid off or extended. Interest payments received on loans on nonaccrual status are generally applied to principal or in accordance with the loan agreement unless the remaining principal balance has been determined to be fully collectible. The Company resumes accruing interest once a loan complies with all of its original or restructured terms. Accrued interest income is written off when deemed uncollectible.

The Company determines the adequacy of the allowance for credit losses for commercial mortgage loans based upon the overall loan portfolio composition, recent and historical loss experience and other pertinent factors. The Company uses a probability of default by loss given default (PDxLGD) methodology to estimate the allowance for credit losses. The Company measures and assesses the credit quality of commercial mortgage loans by using loan-to-value and debt-service coverage ratios. The loan-to-value ratio compares the principal amount of the loan to the fair value at origination of the underlying property collateralizing the loan and is commonly expressed as a percentage. Loan-to-value ratios greater than 100% indicate that the principal amount is greater than the collateral value. Therefore, all else being equal, a lower loan-to-value ratio generally indicates a higher quality loan. The debt-service coverage ratio compares a property's net operating income to its debt-service payments. Debt-service coverage ratios of less than 1.0 indicate that property operations do not generate enough income to cover its current debt payments. Therefore, all else being equal, a higher debt-service coverage ratio generally indicates a higher quality loan.

A loan is considered restructured when the Company makes certain modifications to contractual terms. Depending on the terms of the restructuring, the loan may be considered a new loan or a continuation of an existing loan. The Company considers a loan to be impaired when, based on current information and events, it is probable the Company will not be able to collect all amounts due, both interest and principal, according to the contractual terms of the loan agreement. Impaired loans also include loans that have been modified as a concession to borrowers experiencing financial difficulties. The Company evaluates for impairment all restructured loans and loans with higher impairment risk factors. The impairment recognized is measured as the excess of the loan's recorded investment over the present value of its expected principal and interest payments discounted at the loan's effective interest rate, the fair value of collateral or the loan's observable market price.

Mortgage loans purchased with the intent to resell are carried at the lower of amortized cost or fair value. The difference between cost and fair value is recorded as a valuation allowance with changes in the allowance reported as a component of net income. The fair value is determined on a group basis, split by whether the mortgage loans are commercial or residential.

Real estate is carried at depreciated cost less adjustments for impairments in value. In those cases where it is determined that the carrying amount of the real estate is not recoverable, an

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

impairment loss is recognized based on the difference between the depreciated cost and fair value of the asset. The Company reports impairment losses as part of net investment gains. Depreciation is computed by the straight-line method over the estimated useful life of the asset.

Policy loans are carried at outstanding indebtedness not in excess of policy cash surrender value.

Partnership and joint venture interests where the Company can exercise significant influence, but does not have a controlling interest, are accounted for using the equity method of accounting and included in other invested assets. The Company has elected the fair value option for certain real estate and tax credit partnership interests because management believes that the fair value option more closely aligns the changes in value of the investments with the financial reporting for these investments. The fair value of the investments is determined based upon an internally developed net present value analysis of the expected cash flows. The investments for which the Company has elected the fair value option are included in other invested assets on the Company's consolidated balance sheets. Changes in the fair value of these investments, excluding certain real estate partnership interests used in certain employee benefit plans, are reported in net investment gains in the consolidated statements of income. Partnership and joint venture interests used in certain employee benefit plans, including certain real estate, private debt, and private equity interests, are accounted for at fair value with changes in fair value recorded as net investment income. Dividends received from these investments are recorded as investment income.

The Company uses derivatives to help manage exposures to certain equity and interest rate-related risks and to help manage overall investment yields while exposing the Company to acceptable credit risk. Freestanding derivative investments are recorded at fair value and are reflected as either assets or liabilities, in other invested assets or other liabilities and accrued expenses, respectively, in the consolidated balance sheets. The Company primarily uses derivatives as economic hedges that are not designated as accounting hedges or do not qualify for hedge accounting treatment. If a derivative does not qualify for hedge accounting, the changes in its fair value and all scheduled periodic settlement receipts and payments are reported in net investment gains in the period of the change. See Note 8, Fair Values of Financial Instruments, for policies related to the determination of fair values. See Note 2, Investments, for a detailed discussion of the types of derivatives utilized by the Company as part of its risk management strategy.

Cash and Cash Equivalents

The Company considers short-term investments with an original maturity of three months or less when purchased that do not support the Company's investing activities to be cash equivalents. Cash equivalents are stated principally at amortized cost, which approximates fair value.

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

Premium Revenue and Benefits to Policyholders

The premiums and benefits for whole life and term insurance products and certain annuities with life contingencies (immediate annuities) are fixed and guaranteed. Such premiums are recognized as premium revenue when due. Benefits and expenses are associated with earned premiums so as to result in recognition of profits over the life of the contracts. This association is accomplished by means of the provision for policy benefits and the amortization of deferred acquisition costs.

Universal life policies and investment contracts are policies with terms that are not fixed and guaranteed. The terms that may be changed could include one or more of the amounts assessed to the policyholder, premiums paid by the policyholder or interest accrued to customer deposits. The amounts collected from policyholders for these policies are considered deposits, and only the deductions during the period for cost of insurance, policy administration and surrenders are included in revenue. Policy benefits and claims that are charged to expense include interest credited to contracts and benefit claims incurred in the period in excess of related policy account balances.

Deferred Acquisition Costs

The Company defers costs that are directly related to the successful acquisition or renewal of insurance contracts. Capitalized costs include incremental direct costs of contract acquisition such as commissions and premium taxes, as well as certain third-party and employee costs related directly to acquisition activities such as underwriting, policy issuance and processing, medical and inspection fees and sales force contract selling.

Deferred acquisition costs for traditional dividend paying life insurance products are amortized over the lifetime of the policy in relation to the present value of estimated gross margins from expenses, investments and mortality, discounted using the expected investment yield.

For universal life-type policies and investment contracts, deferred acquisition costs are amortized, with interest, in relation to the present value of estimated gross profits from surrender charges and investment, mortality and expense margins, discounted using the interest rate credited to the policy.

Amortization patterns of deferred acquisition costs are periodically adjusted for: (1) realized investment gains and losses to provide information regarding the impact of such gains and losses on the amount of the amortization; (2) unrealized investment gains and losses to provide information regarding the amount of deferred acquisition costs that would have been amortized if such gains and losses had been realized; and (3) amortization expense to provide amounts related

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

to the gross margins or profits originating from transactions other than investment gains and losses.

Realized investment gains and losses related to certain products have a direct impact on the amortization of deferred acquisition costs. The Company presents realized investment gains and losses net of related amortization of deferred acquisition costs because management believes it provides information useful in evaluating the operating performance of the Company.

Goodwill and Other Intangibles

The excess of cost over the fair value of tangible and other intangible net assets acquired (goodwill) is recognized as an indefinite-lived intangible asset, which is included in goodwill and other intangible assets in the consolidated balance sheets. Goodwill is evaluated for impairment on an annual basis, or more frequently whenever significant events occur or changes in circumstances indicate that an impairment may have occurred in relation to the intangible asset.

Other intangible assets, including the value of business acquired (VOBA), the value of customer relationships acquired (VOCRA), the value of distribution networks acquired (VODA), a trademark license agreement and mutual fund advisory contracts, are also included in goodwill and other intangible assets in the consolidated balance sheets. VOBA is amortized based on estimated gross profits or insurance inforce depending on the underlying insurance product characteristics. VOCRA is amortized based on insurance inforce. VODA is amortized straightline over the expected life of the acquired managing general underwriter relationships. The trademark license agreement is amortized straightline over its contractual life and the mutual fund advisory contracts are amortized straightline over the expected life of the managed funds. Intangible assets are evaluated for impairment on an annual basis, or more frequently whenever significant events occur or changes in circumstances indicate that an impairment may have occurred in relation to the intangible asset.

Impairments are recognized in current operating results to the extent future cash flows are insufficient to recover the value of goodwill or other intangible assets.

Sales Inducements

The Company offers enhanced crediting rates or bonus payments to contractholders on certain fixed annuity products. The expense associated with the bonus is deferred and amortized over the life of the related contract in a pattern that is consistent with the amortization of deferred acquisition costs. The Company has recorded a deferred sales inducements (DSI) asset of \$21.7 million and \$24.8 million in other assets on its consolidated balance sheets as of December 31, 2024 and 2023, respectively. The Company deferred \$3.4 million of sales inducements in 2024 and \$6.6 million in 2023. Amortization expense related to DSI is included with interest credited

Notes to Consolidated Financial Statements (continued)

to policyholder account balances in the consolidated income statements, and was \$5.1 million and \$6.6 million for the years ended December 31, 2024 and 2023, respectively.

Reserves for Future Policy and Contract Benefits

Liabilities for future policy benefits for traditional life contracts are calculated using the net level premium method using assumptions as to interest and mortality. For dividend-paying traditional life contracts, the guaranteed mortality and dividend fund interest rate used is that generally equivalent to the statutory interest rate and the mortality rates guaranteed in the calculation of cash surrender values described in the contract. For all other traditional life contracts, assumptions for investment yields, mortality and withdrawals are principally based on expenses projected at the time of policy issue, with provision for possible adverse deviations. Liabilities for future policy benefits on universal life and investment contracts consist principally of policy account values plus certain deferred policy fees, which are amortized using the same assumptions and factors used to amortize related deferred acquisition costs.

Liabilities for indexed annuity products are equal to the accumulation of host contract values covering guaranteed benefits and the fair value of embedded equity options.

If the future benefits on investment contracts are guaranteed (immediate annuities with benefits paid for a period certain), the liability for future benefits is the present value of such guaranteed benefits.

Assets Held in Separate Accounts

The Company maintains separate account funds on which investment income and gains or losses accrue directly to certain policyholders of variable annuity contracts and group variable life insurance products. The assets of these accounts are legally segregated and are carried at fair value. See Note 8, Fair Values of Financial Instruments, for policies related to the determination of fair values. The related liabilities are recorded at amounts equal to the underlying assets. Investment income and gains or losses from those separate account assets accrue directly to the policyholder and are not included in income of the Company. The majority of variable annuity contracts offer various guaranteed death benefits. The death benefit under the group variable life insurance policies may vary with the investment performance of the underlying investments in the separate accounts. The Company has established reserves for these guarantees, with changes in such reserve balances recorded through a charge to earnings and not as activity within the separate accounts. The fees earned for administrative and contractholder maintenance services performed for these separate accounts are included in other income.

The Company also maintains separate account assets and liabilities for the assets supporting the Company-sponsored defined benefit plan.

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

Dividend Paying Traditional Insurance

Dividend paying traditional insurance represents approximately 16.0% and 16.3% of the Company's life insurance in force and 39.5% and 40.2% of the life insurance premiums in 2024 and 2023, respectively.

Dividends to policyholders are determined annually by the Board of Directors. The amount of the dividend is determined using factors based on approved dividend scales.

Federal Income Taxes

The Company files a consolidated income tax return with its eligible subsidiaries. The provision for federal income taxes is allocated to the individual companies using a separate return method based upon a written tax-sharing agreement. Under the agreement, the benefits from losses of subsidiaries are retained by the subsidiary companies. WSLIC pays all federal income taxes due for all members of the group. WSLIC then immediately charges or reimburses, as the case may be, the members of the group an amount consistent with the method described in the tax-sharing agreement.

The Company includes interest and penalties in the federal income tax line on the consolidated statements of income, including the after-tax cost of interest and penalties related to unrecognized tax benefits. The effect of a change in tax rates on deferred tax assets and liabilities is recorded in the federal income tax line on the consolidated statements of income in the period that includes the enactment date.

The provision for federal income taxes includes amounts currently payable and deferred income taxes resulting from the temporary differences in the assets and liabilities determined on a tax and financial reporting basis.

The Company evaluates uncertain tax positions on an eligible subsidiary basis and establishes a reserve for each eligible subsidiary where sustainability of the deduction is deemed uncertain.

Comprehensive Income

Comprehensive income encompasses all changes in equity, excluding transactions with owners, and includes net income and the effects of changes in unrealized appreciation (depreciation) in the fair value of available-for-sale debt securities, among other items.

Notes to Consolidated Financial Statements (continued)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

Subsequent Events

The Company evaluated events or transactions that may have occurred after the balance sheet date for potential recognition or disclosure through April 15, 2025, the date the consolidated financial statements were available to be issued.

Future Adoption of New Accounting Standards

Long Duration Insurance Contracts

In August 2018, the FASB issued new accounting guidance that impacts accounting for long duration insurance contracts. The main provision of the guidance requires the periodic update of cash flow assumptions that have historically been locked-in at contract issue upon evaluating the liability for future policyholder benefits for traditional and limited pay contracts and prescribes the discount rate used to discount cash flows used in valuation. In addition, the guidance simplifies the accounting for DAC amortization, requires more product guarantees that subject the reporting entity to market volatility to be accounted for at fair value, and will increase disclosure requirements related to long duration contracts. The guidance is effective for fiscal years beginning after December 15, 2024. The guidance will be adopted under a modified retrospective method, with the exception of market risk benefits which will be adopted under a retrospective method. The impact on the transition balance sheet as of January 1, 2024, is an after tax increase to equity between approximately \$550.0 million and \$650.0 million, which is primarily composed of an after tax increase in AOCI.

The increase in equity reported through AOCI primarily reflects the remeasurement of the discount rate used to value cash flows on policyholder benefit liabilities. This discount rate was updated from previously locked-in assumptions to align with the yield on upper-medium-grade (single-A) fixed income instruments. Partially offsetting this increase was the elimination of changes in DAC recorded in AOCI related to unrealized gains and losses on investments.

Total debt securities	\$ ((72,416) \$	2,978,876	\$ ((2,749,837) \$	28,753,532	

Each reporting period, all debt securities are reviewed to determine whether an allowance for credit losses should be recognized. The Company considers relevant facts and circumstances in evaluating whether an unrealized loss is credit related. Relevant facts and circumstances considered include: (1) the extent that fair value is below amortized cost; (2) the reasons for the decline in value; and (3) specific credit issues related to the issuer and current economic conditions, including the current and future impact of any specific events. In addition, for structured investments (e.g., residential mortgage-backed securities, commercial mortgage-backed securities, asset-backed securities and other structured investments), the Company also considers factors such as overall deal structure and its position within the structure, quality of underlying collateral, delinquencies and defaults, loss severities, recoveries, prepayments and cumulative loss projections, and an evaluation of the present value of expected future cash flows in assessing potential credit losses of these investments.

The way in which impairment losses are recognized in the financial statements is dependent on the facts and circumstances related to the specific security. If the Company intends to sell a security or it is more likely than not that it would be required to sell a security before the

Notes to Consolidated Financial Statements (continued)

2. Investments (continued)

recovery of its amortized cost, the Company recognizes an impairment in net investment gains (losses) for the difference between amortized cost and fair value. If the Company does not intend to sell a security, or it is not more likely than not that it would be required to sell a security before the recovery of its amortized cost, and the Company determines that a security is in part in an unrealized loss position due to credit losses, then an allowance for credit losses is established. The change in the allowance for credit losses is recognized in net investment gains (losses).

Allowance for Credit Loss on Available-for-Sale Debt Securities

Changes in the allowance for credit losses on available-for-sale debt securities are as follows:

	orporate curities	Residential mortgage- backed securities	Commercial mortgage- backed securities	Asset- backed securities	Total
			(In Thousands))	
Net balance, December 31, 2022	\$ 	\$ —	\$ —	\$ —	\$ —

Mortgage and other loans		(5,772)	(1,023)	
Impact on policyholder related intangibles		(1,770)	12,685	
Other		36,301	35,373	
Net investment gains (losses)	\$	313,753 \$	283,448	

Proceeds from sales of investments in debt securities, available-for-sale during 2024 and 2023 were \$3,408.6 million and \$2,340.1 million, respectively. Proceeds from sales of investments in equity securities during 2024 and 2023 were \$757.3 million and \$358.0 million, respectively.

Unrealized gains (losses) on equity securities still held at the reporting date recorded within net investment gains (losses) were \$391.8 million and \$337.9 million for the years ended December 31, 2024 and 2023, respectively.

Notes to Consolidated Financial Statements (continued)

2. Investments (continued)

Derivatives

Derivative instruments enable the Company to hedge or reduce exposure to various market risks associated with assets held or expected to be purchased or sold and liabilities incurred or expected to be incurred. The Company primarily enters into derivative agreements for risk management purposes related to the Company's products and operations.

Equity Indexed Products

The Company utilizes options to economically hedge the market risk associated with its indexed annuity and universal life liabilities. The options are designed to correlate with the market return portion of the equity indexed products. Options are contracts that give the option purchaser the right, but not the obligation, to buy or sell securities at a specified price during a specified period. The Company's options are call options that are based on the S&P 500 index, Goldman Sachs Multi-Asset Class index and the J.P. Morgan Strategic BalancedSM Index. The Company's maximum exposure on options is limited to the fair market value as of the reporting date. As a purchaser or seller of options, the Company pays or receives, at the beginning of the contract, a premium for transferring the risk of a change in the price of the indices discussed above.

The fair value of the Company's call options as of December 31, 2024 and 2023, was \$106.9 million and \$98.7 million, respectively. The fair value of the Company's embedded derivatives as of December 31, 2024 and 2023, was \$335.5 million and \$361.8 million, respectively. The Company has recorded the fair value of purchased call options in other invested assets, the fair value of written call options in other liabilities and accrued expenses and the fair value of the embedded derivative on indexed annuities and universal life policies in policy reserves on the consolidated balance sheets. The Company records the changes in fair value of these instruments in net investment gains on the consolidated statements of income. The Company recognized a gain of \$9.4 million and a loss of \$34.6 million for the years ended December 31, 2024 and 2023, respectively.

The Company has entered into a collateral agreement with the counterparty whereby, under certain conditions, the counterparty is required to post collateral on the Company's behalf. The posted amount is equal to the difference between the net positive fair value of the options and the agreed upon thresholds that are based on the credit rating of the counterparty. Inversely, if the net fair value of the option is negative, then the Company may be required to post collateral instead using similar thresholds. At December 31, 2024 and 2023, \$94.4 million and \$70.9 million cash collateral had been posted by the counterparty, respectively.

Notes to Consolidated Financial Statements (continued)

2. Investments (continued)

Counterparty Exposure

Counterparties to derivative instruments expose the Company to credit risk in the event of nonperformance. The Company limits this exposure by diversifying among counterparties with high credit ratings. The Company's credit risk exposure is limited to the fair value of the call options, credit default swaps or interest rate swaps that it has recorded as an asset. The Company does not expect any counterparty to fail to meet its obligations.

The Company's derivative instruments are subject to master netting agreements and are eligible for offset in the consolidated balance sheets. A master netting agreement with a counterparty creates a right of offset for amounts due to and from that same counterparty that is enforceable in the event of a default or bankruptcy. The Company's policy is to recognize amounts subject to master netting agreements on a gross basis in the consolidated balance sheets. The following table presents the gross and net information about the Company's derivatives subject to master netting arrangements for the years ended December 31:

	2024		2023	
		(In Thousa	nds)	
Derivative assets:				
Gross amount of recognized assets	\$	213,963 \$	234,406

Notes to Consolidated Financial Statements (continued)

2. Investments (continued)

Mortgage and Other Loans

The Company's mortgage loan portfolio includes commercial mortgage loans which consist of general purpose income-producing properties, including office buildings, retail facilities, apartments, hotels and industrial properties, and credit tenant loans where the Company relies on the credit analysis of the tenant for the repayment of the loan. Also included in the Company's mortgage loan portfolio are Government National Mortgage Association "early buyout" (GNMA EBO) residential mortgage loans. GNMA EBO's are Federal Housing Administration, U.S. Department of Veterans Affairs or U.S. Department of Agriculture insured loans that were subject to an early buyout by a mortgage servicer from a GNMA mortgage-backed security pool due to delinquency. GNMA EBO's are either partially or fully guaranteed by the full faith and credit of the U.S. government. The Company also has loans that it issues to businesses. These loans are made to non-public borrowers for the purpose of funding growth, acquisition, and working capital needs. The carrying amount of the Company's mortgage and other loan portfolio was as follows:

	December 31			
	2024	2023		
	(In Thousands)			
Commercial mortgage loans	\$ 8,018,742 \$	7,031,043		
Residential mortgage loans	115,335	128,237		
Private credit loans	243,957	88,353		
Allowance for credit losses	(43,380)	(37,608)		
Total carrying value	\$ 8,334,654 \$	7,210,025		

Notes to Consolidated Financial Statements (continued)

2. Investments (continued)

As described in Note 1, the Company updates, at least annually, and analyzes the loan-to-value and debt-service coverage ratios as credit quality indicators for its commercial mortgage loans, which were as follows:

	December 31, 2024							
Loan-to-Value	Carrying Amount		Percent of Subtotal	Debt-Service Coverage Ratio				
			(In Thousands)					
Less than 65%	\$	6,847,435	85.4%	1.67				
65% to 74%		916,770	11.4	1.41				
75% to 100%		254,537	3.2	1.19				
Greater than 100%		_	_	_

2. Investments (continued)

The Company periodically purchases and sells commercial mortgage loans it has originated; however, there were no commercial mortgage loan purchases or sales in 2024 and 2023.

The Company places commercial mortgage loans on nonaccrual status if there is concern regarding the collectability of future payments or if a loan has matured without being paid off or extended; however, there were no commercial mortgage loans on nonaccrual status as of December 31, 2024 and 2023.

The aging of commercial mortgage loans on nonaccrual status and commercial mortgage loans that were 90 days or more past due and still accruing interest were as follows:

		December 31, 2024						
	30–59 Days Past Due	60–89 Days Past Due	90 Days or More Past Due	Total Past Due	Current	Total Mortgage Loans (Amortized Cost)	90 Days or More Past Due and Accruing

Allowance for Credit Losses on Commercial Mortgage and Other Loans

The following represents the activity related to the Company's allowance for credit losses on commercial mortgage and other loans. For commercial mortgage loans, the Company uses a probability of default by loss given default method to estimate the portfolio's expected credit losses:

	\mathbf{N}	mmercial Iortgage	041
		Loans	Other
		(In Thouse	ands)
Net balance, December 31, 2022 (1)	\$	(12,808) \$	_
Transition impact to retained earnings		(23,777)	
(Addition to) release of allowance for credit losses		(1,023)	
Write-offs, net of recoveries			
Net balance, December 31, 2023 (2)		(37,608)	
(Addition to) release of allowance for credit losses		(5,772)	
Write-offs, net of recoveries			_
Net balance, December 31, 2024 (2)	\$	(43,380) \$	

⁽¹⁾ This represents the valuation allowances that were in place prior to the implementation of ASU 2016-13, Financial Instruments- Credit Losses.

⁽²⁾ Accrued interest related to commercial mortgage loans was \$25.2 million and \$19.2 million as of December 31, 2024 and 2023, respectively, and is excluded from the estimate of expected credit losses.

Notes to Consolidated Financial Statements (continued)

3. Variable Interest Entities

Consolidated Variable Interest Entities

Affiliate Managed Investment Entities

The Company has investments with certain limited liability company (LLC), limited partnership (LP), and collateralized loan obligation (CLO) investment entities that qualify as VIEs (see Note 1) in which a subsidiary of the Company both performs investment management services as a central decision maker, and has a more-than-insignificant interest in investor interests. The Company is required to consolidate a VIE when the Company is determined to be the primary beneficiary of the entity. The guidance identifies the primary beneficiary of a VIE as the enterprise with the power to direct the activities of a VIE that most significantly impact the entity's economic performance and the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE. In these circumstances, the management fee is considered a variable interest, and as both the asset manager with a variable interest and a more-than-insignificant investment interest, the Company has concluded it is the primary beneficiary of these VIEs.

Real Estate

The Company has relationships with certain LLCs and LPs that qualify as VIEs that invest in hospitality, multifamily and other commercial real estate. The Company is required to consolidate a VIE when the Company is determined to be the primary beneficiary of the entity. In these circumstances, the voting and other rights held by the Company give it the power to direct the activities that most significantly impact the entity's economic performance, and the Company has concluded that it is the primary beneficiary of these VIEs.

Notes to Consolidated Financial Statements (continued)

3. Variable Interest Entities (continued)

The total assets, which can only be used to settle obligations of the respective VIE, and liabilities of the Company's consolidated VIEs are summarized in the table below:

	20	24	2023			
	Affiliate Managed Investment Entities	Real Estate	Affiliate Managed Investment Entities	Real Estate		
		(In Tho	usands)			
Debt trading securities	\$ 2,900,637	\$	\$ 2,725,117	\$ —

Other liabilities and accrued expenses	29,227	321	40,564	311		
Total liabilities of consolidated VIEs	\$ 1,031,295	\$ 321	\$ 1,022,547	\$ 311		

Unconsolidated Variable Interest Entities

Private Equity and Private Debt Investment Entities

The Company holds variable interests in partnerships and other investment entities classified as VIEs that are managed by unaffiliated parties. These investment entities are considered VIEs due to investors' lack of both substantive rights to remove the central decision maker and substantive participating rights. Lacking the power to direct the activities that most impact the economics of the entity, the Company has determined that it is not the primary beneficiary. The total exposure to loss on these VIEs is limited to the amount of the Company's investment in the VIE.

In addition, certain investment entities, in which a subsidiary of the Company performs investment management services as a central decision maker, are not consolidated as the

Notes to Consolidated Financial Statements (continued)

3. Variable Interest Entities (continued)

Company is not the primary beneficiary due to lacking the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

Real Estate

The Company holds variable interests in real estate entities, in the form of LPs/LLCs, where the Company is not the primary beneficiary. This decision is primarily centered on whether the Company has substantive removal rights in relation to the central decision maker, or unilateral rights in relation to the activities that most impact the economics of the entity. The Company's decision making ability in these LPs/LLCs is primarily shared amongst its partners and substantive removal rights do not exist; therefore the Company has determined that it is not the primary beneficiary. The total exposure to loss on these VIEs is limited to the amount of the Company's investment in the VIE.

In addition, the Company holds investments in funds that, similar to the unconsolidated private equity and debt entities, are managed by a third party whereby the third party cannot be removed by a simple majority of fund investors. These are backed by a portfolio of mortgage loans, a portfolio of direct real estate investments, or a portfolio of entities that hold direct real estate investments. These funds are unconsolidated as the Company does not control the activities that most impact the economics of the VIE. Included in this category of investments, the Company has investments in low income housing tax credit ("LIHTC") partnerships. These partnerships have a similar investment structure, with a central party having decision making authority over the activities that most impact the economics of the entity and that cannot be removed by a simple majority of investors. The main source of return on investment within LIHTC partnerships comes from tax credits earned by the investments and not the underlying equity of the investments.

The carrying value of the Company's investment in unconsolidated VIEs by financial statement line items as of December 31, 2024 and 2023, respectively, is shown in the table below:

	December 31					
	2024	2023				
	(In Thousands)					
Other invested assets:						
Private equity and private debt entities	\$ 905,268	8 \$ 810,054				
Real estate entities	1,537,230	1,350,086				
Total assets	\$ 2,442,504	\$ 2,160,140				

Notes to Consolidated Financial Statements (continued)

3. Variable Interest Entities (continued)

Structured Securities

The Company has investments in structured securities issued by VIEs that are managed by unaffiliated parties. These structured securities include residential mortgage-backed securities, commercial mortgage-backed securities, and asset-backed securities. These investment entities are considered VIEs due to lacking equity to finance the activities of the entity. Lacking the power to direct the activities that most impact the economics of the entity, the Company has determined that it is not the primary beneficiary. The total exposure to loss on these VIEs is limited to the amount of the Company's investment in the VIE. For information about these investments, see Note 2.

4. Deferred Acquisition Costs

A summary of deferred acquisition costs follows:

	Year Ended December 31				
		2024	2023		
	(In Thousands)				
Deferred acquisition costs, January 1	\$	2,159,859 \$	2,210,603

Senior notes, 5.75% interest rate, due 2033		496,841		496,478
Surplus notes, 5.15% interest rate, due 2049		492,032		491,871
Surplus notes, 3.75% interest rate, due 2061		492,061		491,962
Other notes payable		3,328		2,141
Short-term line of credit ⁽¹⁾		_		150,000
	\$	3,818,644	\$	3,689,709

⁽¹⁾ On December 26, 2023, the Company completed a draw on a short-term line of credit (LOC). The LOC had a principal amount of \$150.0 million at an interest rate of 6.46%. The LOC liability is included in other liabilities and accrued expenses on the consolidated balance sheets. On March 29, 2024 the Company paid back the \$150.0 million principal balance on the LOC.

Notes to Consolidated Financial Statements (continued)

7. Debt (continued)

On July 7, 2003, the Company completed a senior notes offering (The Notes) pursuant to Rule 144A under the Securities Act of 1933, as amended. The Notes consist of unsecured senior obligations with an aggregate principal amount of \$350.0 million at an interest rate of 5.75%. The Notes mature on July 15, 2033. Interest is paid semiannually on January 15 and July 15 of each year, beginning January 15, 2004.

On January 15, 2004, the Company completed a reopening of The Notes issued on July 7, 2003. The reopening constituted a further issuance of, and has been consolidated with, The Notes issued on July 7, 2003. The reopening was sold with an original issue discount of \$3.9 million creating an effective yield for the reopening of 5.94%. The aggregate amount of principal in the reopening was \$150.0 million, for a total amount of \$500.0 million unsecured senior obligations under The Notes, as of January 15, 2004.

The Company completed two surplus notes issuances (collectively the Surplus Notes), the first on January 23, 2019 (the 2019 Surplus Notes) and the second on April 28, 2021 (the 2021 Surplus Notes), pursuant to Rule 144A as defined by the Securities Act of 1933, as amended. Each issuance consisted of unsecured obligations with an aggregate principal amount of \$500.0 million in exchange for \$497.4 million and \$497.6 million in cash, respectively, for the 2019 Surplus Notes and the 2021 Surplus Notes. The 2019 Surplus Notes have an annual interest rate of 5.15%, with interest paid semi-annually on January 15 and July 15 of each year, and a maturity date of January 15, 2049. The 2021 Surplus Notes have an annual interest rate of 3.75%, with interest paid semi-annually on April 28 and October 28 of each year, and a maturity date of April 28, 2061. Each payment of principal, of interest on or redemption price with respect to the Surplus Notes, may be made only with the prior approval of the Ohio Director of Insurance.

The nonrecourse trust and partnership obligations are primarily related to CLO, real estate partnerships and limited liability companies. At December 31, 2024 and 2023, the non-recourse debt associated with CLO totaled \$1,002.1 million and \$982.0 million, respectively, and the non-recourse debt associated with real estate partnerships and limited liability companies totaled \$127.4 million and \$132.5 million, respectively.

Included in other liabilities and accrued expenses on the Company's consolidated balance sheets are other partnership obligations, which are primarily related to real estate partnerships and limited liability companies, with certain recourse provisions up to \$2.2 million and \$16.7 million at December 31, 2024 and 2023, respectively.

During 2024 and 2023, the Company engaged in certain securities lending transactions for the purpose of enhancing the yield on its investment securities portfolio. The securities lending program is administered by Deutsche Bank. The Company loaned \$1,176.0 million and \$916.9 million of various U.S. Treasury securities, corporate securities and equity securities as part of a

Notes to Consolidated Financial Statements (continued)

7. Debt (continued)

securities lending program as of December 31, 2024 and 2023, respectively. The Company requires collateral in the amount of 102% of fair value of the applicable securities loaned. The Company monitors the fair value of the underlying securities as compared with the related receivable or payable, including accrued interest, and requests additional collateral as necessary. The Company maintains effective control over all loaned securities and, therefore, continues to report such securities as invested assets in the consolidated balance sheets. The collateral received is primarily invested in debt securities and short-term investments with an offsetting liability recognized in securities lending obligations for the obligation to return the collateral. The Company had \$1,211.9 million and \$935.9 million of collateral as of December 31, 2024 and 2023, respectively.

The remaining contractual maturities for securities lending transactions accounted for as secured borrowings were as follows:

Interest paid by the Company on total debt was \$154.0 million and \$155.3 million, and interest expensed by the Company was \$157.6 million and \$158.4 million for 2024 and 2023, respectively. Interest expense is included in other operating expenses within the Company's consolidated statements of income. Included in interest paid was \$28.8 million and \$28.8 million and included in interest expensed was \$29.1 million and \$29.1 million in 2024 and 2023, respectively, related to The Notes. Included in interest paid was \$44.5 million and \$44.5 million and included in interest expensed was \$44.8 million and \$44.7 million in 2024 and 2023, respectively, related to the Surplus Notes. The remaining amounts of interest paid and interest expensed relate primarily to nonrecourse trust and partnership obligations.

Aggregate maturities of the Company's long-term debt (excluding securities lending obligations) are as follows: 2025 - \$51.2 million; 2026 - \$0.3 million; 2027 - \$38.3 million; 2028 - \$0.2 million; 2029 - \$43.4 million and thereafter - \$2,482.5 million.

Notes to Consolidated Financial Statements (continued)

8. Fair Values of Financial Instruments

The Company uses fair value measurements to record the fair value of certain assets and liabilities and to estimate the fair value of financial instruments not recorded at fair value but required to be disclosed at fair value. The Company follows fair value measurement principles in determining fair value disclosure amounts. Certain financial instruments, particularly policyholder liabilities other than investment-type contracts, are excluded from this fair value discussion.

Fair value is defined as the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy prioritizes inputs to valuation techniques used to measure fair value into three levels:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities. The Company's Level 1 assets and liabilities primarily include U.S. Treasury securities, exchange-traded equity securities, mutual funds and short-term investments.
- Level 2 Inputs other than quoted prices included in Level 1 that are observable for the
 asset or liability, either directly or indirectly. The Company's Level 2 assets and
 liabilities primarily include certain debt and equity securities, debt trading securities,
 freestanding derivatives for which public price quotations are not available but that use
 other market observable inputs from third-party pricing service quotes or internal
 valuation models using observable inputs and nonrecourse trust and partnership
 obligations.
- Level 3 Significant unobservable inputs for the asset or liability. The Company's Level 3 assets and liabilities primarily include certain debt securities, certain real estate and tax credit partnership interests, freestanding derivatives and embedded derivatives that must be priced using non-binding broker quotes or other valuation techniques that utilize significant unobservable inputs.

The following discussion describes the valuation methodologies utilized by the Company for assets and liabilities measured or disclosed at fair value. Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instrument, including discount rates, estimates of timing, amount of expected future cash flows and the credit standing of the issuer. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument.

As described below, certain fair values are determined through the use of third-party pricing services. The Company does not adjust prices received from third parties; however, the Company does analyze the third-party pricing services' valuation methodologies and related inputs and perform additional evaluation to determine the appropriate level within the fair value hierarchy.

Notes to Consolidated Financial Statements (continued)

8. Fair Values of Financial Instruments (continued)

The Company performs annual due diligence of third-party pricing services, which includes assessing the vendor's valuation qualifications, control environment, analysis of asset class specific valuation methodologies and understanding of market observable assumptions and unobservable assumptions, if any, employed in the valuation methodology.

For Level 3 investments, the fair value estimates cannot be substantiated by comparison to independent markets. Care should be exercised in deriving conclusions about the Company's business, its value or financial position based on the fair value information of financial instruments presented below.

Debt Securities

The fair values of actively traded debt securities have been determined through the use of third-party pricing services utilizing market observable inputs. Private placement securities trading in less liquid or illiquid markets with limited or no pricing information are valued using either broker quotes or by discounting the expected cash flows using current market-consistent rates applicable to the yield, credit quality and maturity of each security.

Equity Securities

The fair values of actively traded equity securities have been determined utilizing publicly quoted prices obtained from third-party pricing services. The fair values of certain equity securities for which no publicly quoted prices are available have been determined through the use of third-party pricing services utilizing market observable inputs. Actively traded mutual funds are valued using the net asset values of the funds.

Debt Trading Securities

The fair values of these assets have been determined using the same methodologies outlined above for debt and equity securities.

Short-Term Investments

The fair values of short-term investments are based on quoted market prices.

Other Invested Assets

The fair values of private equity investments have been determined using available sales prices, the net asset values of the funds or internal valuation methodologies appropriate for the specific assets.

Notes to Consolidated Financial Statements (continued)

8. Fair Values of Financial Instruments (continued)

The fair values of freestanding derivative instruments, primarily call options, are determined using market observable inputs from third-party pricing service quotes or internal valuation models using observable inputs, when available. When market observable inputs are unavailable the Company utilizes valuation models incorporating significant unobservable inputs, including projected discounted cash flows, applicable swap curves and implied volatilities.

The fair values of certain real estate partnership investments have been determined utilizing third-party appraisals or internal valuation methodologies appropriate for the specific assets.

Assets Held in Separate Accounts

Assets held in separate accounts include debt securities, equity securities, mutual funds, private funds that invest primarily in domestic debt securities and private equity investments. The fair values of these assets have been determined using the same methodologies outlined above for debt and equity securities.

Policy Reserves

Equity indexed annuity contracts and universal life policies include embedded derivatives that have been bifurcated from the host contract. The fair value of embedded derivatives is calculated based on actuarial and capital market assumptions reflecting the projected cash flows over the life of the contract and incorporating expected policyholder behavior and the Company's own credit risk

Nonrecourse Trust and Partnership Obligations

Nonrecourse trust and partnership obligations held at fair value consist of debt issued by CLOs consolidated by the Company. The Company has elected to use a practical expedient, allowing the Company to calculate the carrying value of the CLO liabilities based on the fair value of the associated CLO assets (which have more observable fair values) as an alternative to reporting those liabilities at a separately measured fair value. As a result, the liabilities are reported within the fair value hierarchy on the same proportional basis as the CLO assets.

Other Liabilities and Accrued Expenses

Other liabilities and accrued expenses include certain freestanding derivatives, primarily written call options, and certain embedded derivatives related to modified coinsurance arrangements. The fair values of these freestanding derivative instruments have been determined using the same methodologies outlined above for derivative assets. The fair values of the embedded derivatives are determined using the fair values of the underlying securities of the agreement.

Notes to Consolidated Financial Statements (continued)

8. Fair Values of Financial Instruments (continued)

Assets and liabilities measured at fair value on a recurring basis at December 31, 2024 and 2023, are outlined below:

Notes to Consolidated Financial Statements (continued)

8. Fair Values of Financial Instruments (continued)

Included in other invested assets in the tables above are the Company's investments in certain private equity funds held at fair value. The Company invests in private equity funds that primarily make direct and indirect venture capital and buyout investments. The fair values of private equity investments are, in most cases, determined based upon the net asset value of the funds and have not been classified in the fair value hierarchy. The private equity funds are primarily closed-end funds in which the Company's investments are not eligible for redemption. Distributions will be received from these funds as the underlying assets are liquidated and it is estimated that substantially all of the underlying assets of existing funds will be liquidated over the next 15 years. The fair values of the Company's investments in these private equity funds were \$328.0 million and \$376.9 million and unfunded commitments to these private equity funds were \$136.3 million and \$224.8 million as of December 31, 2024 and 2023, respectively.

Notes to Consolidated Financial Statements (continued)

8. Fair Values of Financial Instruments (continued)

The reconciliation, including gross purchases, issuances, sales and settlements, for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the year ended December 31, 2024, is as follows:

⁽¹⁾ Transfers into/out of Level 3 are recognized as of the beginning of the reporting period. Transfers into Level 3 are due to securities where the price source has changed to utilizing a valuation methodology that incorporates significant unobservable inputs. Transfers out of Level 3 are due to securities where the price source has changed to utilizing third party pricing services utilizing market observable inputs.

During 2024 and 2023, the Company did not experience any transfers between Level 1 and Level 2 of the fair value hierarchy. During 2024 and 2023, there were no material assets or liabilities measured at fair value on a nonrecurring basis.

Notes to Consolidated Financial Statements (continued)

9. Funding Agreements

Through its association with the Federal Home Loan Bank (FHLB), the Company can enter into funding agreements. The Company had liabilities for these funding agreements of \$3,570.4 million and \$3,099.9 million as of December 31, 2024 and 2023, respectively. The contracts are recorded in policy reserves on the consolidated balance sheets, and will mature between 2025 and 2032. Interest is credited monthly at fixed annual rates ranging between 1.46% and 5.45% in 2024 and 0.53% and 5.61% in 2023. The Company pledged collateral for these funding agreements, which consisted of investments with a carrying value of \$8,284.3 million and \$6,486.2 million at December 31, 2024 and 2023, respectively. Based on the outstanding funding agreements and pledged collateral, the Company is maintaining collateral in excess of what is required at the FHLB of approximately \$3.9 billion and \$2.9 billion at December 31, 2024 and 2023, respectively.

Notes to Consolidated Financial Statements (continued)

10. Pension and Other Postretirement Benefit Plans

The Company has a noncontributory pension plan under a deposit administration group annuity contract covering substantially all employees and field representatives that meet eligibility requirements while working for the Company and attaining normal retirement age. In addition, the Company provides certain healthcare and life insurance benefits for certain retired employees or their beneficiaries.

Information regarding the funded status of the pension plan and other postretirement healthcare and life insurance benefits as a whole is as follows:

		Pension Bei	nefits	Postretiren Healthcare ar Insurance Be	ıd Life

10. Pension and Other Postretirement Benefit Plans (continued)

Information regarding the amounts recognized in accumulated other comprehensive income (loss), net of income taxes, related to the pension plan and other postretirement healthcare and life insurance benefits plan is as follows at December 31, 2024 and 2023:

		Pension Be	nefits	Postretirement Healthca and Life Insurance Bene						
		2024	2023		2024	2023				
	•	(In Thousands)								
Actuarial loss (gain)	\$	(70,858) \$	21,761	\$	(59,560) \$	(54,762)				
Prior service cost (credit)		1,493	1,913		(155)	(186)				
Total	\$	(69,365) \$	23,674	\$	(59,715) \$	(54,948)				

Information regarding the amounts recognized in other comprehensive income, net of income taxes, related to the pension plan and other postretirement healthcare and life insurance benefits plan is as follows for the years ended December 31, 2024 and 2023:

	 Pension Be	nefits	Postretiremen and Life Insura	
	2024	2023	2024	2023
		(In Tho	usands)	
Change in actuarial loss (gain)	\$ (92,619) \$	(28,597)	\$ (4,798)	11,186
Change in prior service cost (credit)	 (420)	(420)	31	31
Total	\$ (93,039) \$	(29,017)	\$ (4,767)	5 11,217

The accumulated benefit obligation for the defined benefit pension plan was \$767.4 million and \$796.6 million at December 31, 2024 and 2023, respectively.

Notes to Consolidated Financial Statements (continued)

10. Pension and Other Postretirement Benefit Plans (continued)

The assumptions used to determine net periodic benefit cost for the year ended December 31 were as follows:

	Pension	Benefits	Postreti Healthcar Insurance	e and Life
	2024	2023	2024	2023
Discount rate	5.13%	5.46%	5.11%	5.45%
Rate of compensation increase	4.60%	4.60%	N/A	N/A
Expected return on plan assets	7.50%	7.25%	N/A	N/A

The assumptions used to determine the benefit obligation as of December 31 were as follows:

	Pension	Benefits	Healthcar	irement e and Life e Benefits
	2024	2023	2024	2023
Discount rate	5.72%	5.13%	5.69%	5.11%
Rate of compensation increase	4.60%	4.60%	N/A	N/A

The Company utilizes a full yield curve approach in the estimation of liabilities, service cost, and interest cost for pension and postretirement benefits by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows. The yield curve utilized in the cash flow analysis is comprised of highly rated (Aaa or Aa) corporate bonds. The discount rate was increased from 5.13% at December 31, 2023 to 5.72% at December 31, 2024 which resulted in a \$57.1 million decrease in the pension benefit obligation in 2024. The discount rate was decreased from 5.46% at December 31, 2022 to 5.13% at December 31, 2023 which resulted in a \$34.2 million increase in the pension benefit obligation in 2023.

The Company employs a prospective building block approach in determining the long-term expected rate of return for plan assets. Historical returns are determined by asset class. The historical relationships between equities, fixed income securities, and other assets are reviewed. The Company applies long-term asset return estimates to the plan's target asset allocation to determine the weighted-average long-term return. The Company's long-term asset allocation was determined through modeling long-term returns and asset return volatilities and is guided by an investment policy statement created for the plan.

Notes to Consolidated Financial Statements (continued)

10. Pension and Other Postretirement Benefit Plans (continued)

For purposes of measuring the benefit obligation, a 5.275% rate of increase in the cost of covered healthcare benefits was assumed for 2025. The rate was assumed to decrease gradually to 4.75% for 2032 and remain at that level thereafter.

The Company uses a December 31 measurement date for all plans.

The actual asset allocation for the defined benefit pension plan at the end of 2024 and 2023, and the target allocation for 2024, by asset category, are as follows:

	Target Allocation Percentage	Actual Percentage of Plan Assets		
		2024	2023	
Asset category	-			
Equity securities	60%	65%	65%	
Debt securities	13%	16	11	
Other	27%	19	24	
Total	_ _	100%	100%	

The plan employs a total return investment approach whereby a mix of fixed income and equity investments is used to maximize the long-term return of plan assets for a prudent level of risk. Risk tolerance is established through careful consideration of plan liabilities, plan funded status and corporate financial condition. The total portfolio is structured with multiple sub-portfolios, each with a specific fixed income or equity asset management discipline. Each sub-portfolio is subject to individual limitations and performance benchmarks as well as limitations at the consolidated portfolio level. Quarterly asset allocation meetings are held to evaluate portfolio asset allocation and to establish the optimal mix of assets given current market conditions and risk tolerance. Investment mix is measured and monitored on an ongoing basis through regular investment reviews, annual liability measurements and periodic asset/liability studies.

The Company's pension plan assets consist primarily of debt and equity securities, mutual funds and private equity funds, all of which are carried at fair value.

Fair value is defined as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date (an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels.

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.
 The Company's Level 1 assets primarily include exchange-traded equity securities and mutual funds.

Notes to Consolidated Financial Statements (continued)

10. Pension and Other Postretirement Benefit Plans (continued)

- Level 2 Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. The Company's Level 2 assets primarily include certain debt securities for which public price quotations are not available, but that use other market observable inputs from third-party pricing service quotes or internal valuation models using observable inputs. Level 2 assets also include private funds that invest primarily in domestic debt securities where the Company has the right to redeem its interest at net asset values. The underlying debt securities within these funds employ similar valuation methodologies as the Company's other investments in debt securities.
- Level 3 Significant unobservable inputs for the asset or liability. The Company's Level 3 assets primarily include real estate partnership interests.

Debt Securities

The fair values of actively traded debt securities have been determined through the use of third-party pricing services utilizing market observable inputs.

Equity Securities

The fair values of actively traded equity securities have been determined utilizing publicly quoted prices from third-party pricing services.

Mutual Funds

The fair values of mutual funds have been determined utilizing the net asset values of the funds.

Private Equity and Fixed Income Funds

The Company invests in private equity funds, which primarily make direct and indirect venture capital and buyout investments, and fixed income funds, which primarily make direct investments in fixed income securities across various sectors. The fair values of private equity and fixed income funds have been determined utilizing the net asset values of the funds. The unfunded commitment to private equity funds was approximately \$68.2 million and \$74.5 million at December 31, 2024 and 2023, respectively.

Notes to Consolidated Financial Statements (continued)

10. Pension and Other Postretirement Benefit Plans (continued)

The fair value of the pension plan's assets by asset category is as follows:

Amount of recognized loss (gain) (1) (2)	_		(12,504)	(10,836)
Amortization of prior service cost (credit) (1) (2)	531	531	(39)	(39)
Net periodic benefit cost	\$ (17,728) \$	(15,023) \$	(3,303) \$	(736)

⁽¹⁾ Reclassifications from other comprehensive income to net investment gains (losses).

The assets of the Company's pension included approximately \$97.4 million and \$52.7 million invested in Touchstone Funds - mutual funds administered by a subsidiary of the Company - as of December 31, 2024 and December 31, 2023, respectively. The assets of the Company's pension also included approximately \$205.2 million and \$240.7 million invested in private equity and fixed income funds managed by Fort Washington Investment Advisors, Inc. as of December 31, 2024 and December 31, 2023, respectively.

The Company did not contribute to the pension plan in 2024 and 2023. The Company does not expect to make contributions to the pension plan during 2025.

The Company contributed \$14.4 million to the postretirement healthcare and life insurance benefits plan in 2024.

In 2023, the Company entered into a group annuity contract with WSLAC to transfer risk and administration costs associated with its pension benefit obligation in the amount of \$54.6 million, which is included in the Settlements line in the change in projected benefit obligation table.

As of December 31, 2024, future benefit payments for the pension plan are expected as follows: 2025 – \$54.5 million; 2026 – \$55.2 million; 2027 – \$56.2 million; 2028 – \$57.1 million; 2029 – \$58.0 million; and the five years thereafter – \$302.1 million. Future net benefit payments for the postretirement healthcare and life insurance benefits plan, which will be made by the Company,

⁽²⁾ Included in net investment gains (losses).

Notes to Consolidated Financial Statements (continued)

10. Pension and Other Postretirement Benefit Plans (continued)

are expected as follows: 2025 - \$12.8 million; 2026 - \$12.4million; 2027 - \$12.1 million; 2028 - \$11.8 million; 2029 - \$11.8 million; and the five years thereafter - \$56.9 million.

The Company sponsors a defined contribution plan covering substantially all eligible, full-time employees. This plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Company's contributions to the plan are based on a combination of the employee's contributions to the plan and a percentage of the employee's earnings for the year. Total Company contributions to the defined contribution plan were \$5.9 million and \$5.7 million for 2024 and 2023, respectively.

11. Income Taxes

The components of income taxes are as follows:

	Year Ended December 3: 2024 2023				
		(In Thousands)			
Current federal income tax expense	\$	85,765 \$	119,449		
Deferred federal income tax expense (benefit)		93,591	31,056		
State income tax expense (net of federal income tax benefit)		9,219	8,208		
Income tax expense (benefit)	\$	188,575 \$	158,713		

Notes to Consolidated Financial Statements (continued)

11. Income Taxes (continued)

A reconciliation of the income tax attributable to continuing operations computed at the U.S. statutory tax rates to the income tax expense (benefit) included in the consolidated statements of income follows:

	Year Ended December 31				
		2024	2023		
		inds)			
Income tax computed at statutory tax rate	\$	214,347 \$	195,978		
Income tax attributable to noncontrolling interests		(3,101)	(4,213)		
Current and deferred beginning balance adjustment		26,491	(2,158)		
Tax credits		(38,298)	(38,375)		
Dividends received deduction		(6,217)	(8,223)		
Prior year tax		_	59		
State income tax (net of federal income tax benefit)		9,219	8,208		
Other, net		(13,866)	7,437		
Income tax expense (benefit)	\$	188,575 \$	158,713		

Income taxes paid were \$117.0 million and \$93.9 million in 2024 and 2023, respectively.

The Company recognizes the after-tax cost of interest and penalties related to income taxes in state and federal income tax expense.

Notes to Consolidated Financial Statements (continued)

11. Income Taxes (continued)

The following table provides a reconciliation of the beginning and ending amounts of the Company's unrecognized tax benefits:

	December 31			
	2024		2023	
	(In Tho	usar	nds)	
Unrecognized tax benefits at January 1	\$ 4,862	\$	4,862	
Gross increases for tax positions taken during the prior period	_		_	
Gross decreases for tax positions taken during the prior period	_		_	
Gross increases for tax positions taken during the current period	_		_	
Settlements with taxing authorities from positions taken in the prior period	_		_	
Unrecognized tax benefits at December 31 (1)	\$ 4,862	\$	4,862	

⁽¹⁾ With the exception of \$2.7 million and \$2.7 million in 2024 and 2023, respectively, all amounts represent unrecognized tax benefits that, if recognized, would affect the annual effective tax rate.

The Company's unrecognized tax benefits as of December 31, 2024 and 2023 primarily related to federal income tax items that IRS examiners have indicated their disagreement with the Company's treatment on original and amended tax returns. While it is reasonably possible that the amount of the unrecognized tax benefits with respect to certain of the Company's uncertain tax positions could increase or decrease during the next twelve months, the Company believes it is unlikely that its unrecognized tax benefits will change by a material amount in the next twelve months.

The Company's 2014 through 2017 and 2021 through 2024 tax years remain subject to examination by the IRS and/or other tax jurisdictions.

Notes to Consolidated Financial Statements (continued)

11. Income Taxes (continued)

Net deferred income tax (asset) liability	\$	(193,822) \$	(300,989)

Notes to Consolidated Financial Statements (continued)

12. Equity

The components of the Company's capital structure at December 31, 2024 and 2023, are as follows (in thousands):

Equity Type	Par Value	Number of Shares Authorized	Number of Shares Issued	Number of Shares Outstanding	Voting Rights
Class A Common Stock	s	500,000			Yes
Class B Common Stock	—	350,000	350,000	350,000	Yes
Class A Preferred Stock	_	100,000	_		No
Class B Preferred Stock		100,000			No

13. Comprehensive Income (Loss)

The following summarizes the changes in other comprehensive income (loss) by component (in thousands):

	Year Ended December 3		
	2024		2023
Available-for-sale debt securities			
Unrealized holding gains (losses) on securities arising during the period	\$	(147,019) \$	1,462,924
Additional amount related to deferred acquisition costs and deferred sales inducements		66,326	(197,261)
Additional amount related to policyholder dividend obligation		20,978	(2,536)
Additional amount related to other intangible (assets) liabilities		(1,954)	(619)
Reclassification adjustment for investment (gains) losses realized in net income		99,288	111,638
Income tax benefit (expense)		(7,900)	(288,571)
Change in net unrealized gains (losses) on available-for-sale debt securities included in comprehensive income (loss)	\$	29,719 \$	1,085,575

Notes to Consolidated Financial Statements (continued)

13. Comprehensive Income (Loss) (continued)

	Year Ended December 31			
		2024	2023	
Currency translation adjustment				
Unrealized holding gains (losses) on currency translation arising during the period	\$	— \$	(1,176)	
Income tax benefit (expense)		_	247	
Change in currency translation included in comprehensive income (loss)	\$	— \$	(929)	

Unrecognized postretirement benefit obligation

See components of net periodic benefit cost table in Note 10 for information regarding the amounts recognized in other comprehensive income related to the pension plan

The following provides detail on the reclassifications out of other comprehensive income (loss) for available-for-sale debt securities:

	Year Ended December 31				
		2024	2023		
		(In Thousa	nds)		
Unrealized gain (loss) on:					
Gross reclassification	\$	104,731 \$	119,639		
Change in DAC, DSI and PDO		(5,443)	(8,001)		
Reclassification before income tax benefit (expense) ⁽¹⁾		99,288	111,638		
Income tax benefit (expense) (2)		(20,850)	(23,444)		
Reclassification, net of income tax	\$	78,438 \$	88,194		

⁽¹⁾ Amount reported in net investment gains (losses) on the consolidated statements of income.

⁽²⁾ Amount reported in income tax expense (benefit) on the consolidated statements of income.

Notes to Consolidated Financial Statements (continued)

14. Regulatory Matters

The Company's insurance subsidiaries are required by statutory regulations to meet minimum risk-based capital standards. Risk-based capital is a method of measuring the minimum amount of capital appropriate for an insurance company to support its overall business operations, considering its size and risk profile. Insurance companies are also required to file financial statements with state insurance regulatory authorities prepared on an accounting basis prescribed or permitted by such authorities (statutory basis). At December 31, 2024 and 2023, WSLIC had statutory-basis capital and surplus of \$7,266.7 million and \$7,033.2 million, respectively, and Lafayette Life had statutory-basis capital and surplus of \$468.9 million and \$455.3 million, respectively. These amounts significantly exceeded the minimum risk-based capital requirements for WSLIC and Lafayette Life.

State regulatory authorities have powers relating to granting and revoking licenses to transact business, the licensing of agents, the regulation of premium rates and trade practices, the form and content of insurance policies and the content of advertising material. These regulatory authorities also limit the amount of dividends based on earnings and surplus, which can be paid to a parent in a holding company structure. Based on these limitations, WSLIC is able to pay Western & Southern dividends of up to \$726.7 million in 2025 without seeking prior regulatory approval. Lafayette Life can pay Western & Southern dividends of up to \$46.9 million in 2025 without seeking prior regulatory approval.

15. Related-Party Transactions

At December 31, 2024 and 2023, the Company had \$435.8 million and \$393.2 million, respectively, invested in the Touchstone Funds, mutual funds administered by a subsidiary of the Company.

16. Commitments and Contingencies

The Company is named as a defendant in various legal actions arising principally from claims made under insurance policies and contracts. The Company believes the resolution of these actions will not have a material effect on the Company's financial position or results of operations.

At December 31, 2024, the Company does not have any significant lease agreements as a lessee for office space or equipment.

The Company has future commitments to joint ventures, limited partnerships and limited liability companies, including those related to Low Income Housing Tax Credits, in the amount of \$836.1 million.

Notes to Consolidated Financial Statements (continued)

16. Commitments and Contingencies (continued)

As of December 31, 2024, the Company had commitments to fund \$821.6 million of commercial mortgage loans. In addition, the Company had commitments to fund \$314.9 million of debt capital.

17. Reinsurance

The Company routinely enters into reinsurance transactions with other insurance companies. This reinsurance involves either ceding risks to or assuming risks from other insurance companies. The primary purpose of ceded reinsurance is to protect the Company from potential losses in excess of levels that it is prepared to accept. The Company's general practice is to retain no more than \$2.0 million of risk on any one person's life. The Company reinsures certain of its risks to reinsurers under yearly renewable term, coinsurance and modified coinsurance arrangements. Yearly renewable term and coinsurance arrangements result in passing a portion of the risk to the reinsurer. Generally, the reinsurer receives a proportionate amount of the premiums less an allowance for commissions and expenses and is liable for a corresponding proportionate amount of all benefit payments. Modified coinsurance is similar to coinsurance except that the cash and investments and the related liabilities contract benefits are not transferred to the assuming company, and settlements are made on a net basis between the companies. Reinsurance accounting is followed for ceded transactions when risk transfer provisions have been met.

Assets and liabilities related to reinsurance ceded are reported on a gross basis. Premiums and expenses are reported net of reinsurance ceded. The effects of reinsurance on premiums and other considerations and policy and contract benefits and expenses, excluding the change in policyholder reserves, were as follows:

	Year Ended December			
		2024	2023	
		(In Thousands)		
Insurance premiums and other considerations:				
Direct	\$	3,704,317 \$	3,829,576	
Assumed		51,735	56,086	
Ceded		(333,042)	(344,123)	
Net insurance premiums and other considerations	\$	3,423,010 \$	3,541,539	

Notes to Consolidated Financial Statements (continued)

17. Reinsurance (continued)

	Y	Year Ended December 31		
		2024	2023	
		(In Thousands)		
Benefits and expenses:				
Direct	\$	2,144,576 \$	1,971,797	
Assumed		35,906	45,914	
Ceded		(267,266)	(254,438)	
Net benefits and expenses	\$	1,913,216 \$	1,763,273	

Reinsurance does not discharge the Company from its primary liability to policyholders and to the extent that a reinsurer should be unable to meet its obligations, the Company would be liable to policyholders. The Company enters into reinsurance agreements only with highly rated reinsurers and monitors ratings during the life of the agreements. The Company has not incurred any significant credit losses from reinsurance activities in 2024 or 2023. At December 31, 2024 and 2023, the Company had \$188.5 million and \$194.9 million of net reinsurance recoverables, respectively, from its various reinsurance arrangements. The cost of reinsurance is accounted for over the terms of the underlying reinsured policies using assumptions consistent with those used to account for the policies. At December 31, 2024 and 2023, respectively, the Company had reinsured \$50.2 billion and \$47.9 billion of life insurance in force, representing 31.7% and 30.9% of the Company's total life insurance in force, respectively.
